NATIONAL OPINION RESEARCH CENTER

Founded in 1941, the National Opinion Research Center (NORC) is the oldest national survey research facility that is not-for-profit and university affiliated. Through its Survey Operations Group, NORC provides consultation and services on the full range of survey research tasks--study design and analysis, sampling, questionnaire design, data collection, and data processing--for a wide range of clients in the research community. NORC maintains a national probability sample, which is fully revised to accord with 1980 Census information. Both the Chicago and New York offices are capable of providing all such services. Many NORC surveys are archived at the Roper Public Opinion Research Center and in NORC's own data archive.

ROPER PUBLIC OPINION RESEARCH CENTER

The establishment of the Roper Public Opinion Research Center in 1946 was at the time a highly innovative step in the development of research in the social sciences. The Roper Center has become not only a national, but an international data resource. Originally, the Center held the basic data from 177 surveys conducted by Roper Research Associates. By 1975, the data bank contained the original response data from approximately 13,000 surveys (dating from 1936) contributed by 121 survey research organizations in 74 countries. Annually, the Center acquires between 400 and 500 additional data sets.

The usage of the Roper Center by academic social scientists, government agencies, foundations, and nonprofit research organizations has in the past 25 years grown from 15 accesses annually to over 2,000 per year. Many educational institutions in the United States and abroad have formally affiliated with the Roper Center through its International Survey Library Association program, an active partnership between the Roper Center and the academic community. Inquiries regarding the program are welcome.

Summary: This cumulative data file merges all 12 General Social Surveys (1972-1978, 1980, 1982-85 there are no 1979 or 1981 data) into a single file with each year or survey acting as a subfile. This arrangement of the data facilitates trend analysis on repeated questions over the thirteen-year period.

PREFACE

The National Data Program for the Social Sciences is designed as a data diffusion project and a program of social indicator research. The data come from the General Social Surveys, interviews administered to NORC national samples using a standard questionnaire.

Toward the major goal of functioning as a social indicator program, items which have appeared on previous national surveys between 1937 and 1978 have been replicated here. The search for trend items led us to published reports from Gallup, Harris, the Detroit Area Study, SRC (Michigan) studies, NORC files, and Federal Commissions such as those on Violence and Pornography. By retaining the exact wording, we hope to facilitate time trend studies as well as replications of earlier findings.

For the base line items in the initial 1972 survey, some 105 sociologists and social scientists reviewed drafts of the questionnaire, suggested revisions and additions, and expressed their question preference by vote. Their serious assistance was extremely helpful in putting together a final version of the questionnaire which would represent the varied interests of social scientists. Topic and question selection is monitored by a Board of Overseers: Duane Alwin, James Beniger, Richard A. Berk, Judith Blake, Ron Burt, Stephen J. Cutler, Greg A. Duncan, Norval Glenn, Robert M. Groves, David Knoke, Karen Mason, John Mueller, Stanley Presser, John P. Robinson, and Peter Rossi (Chair). On the recommendation of the Overseers GSS surveys starting in 1985 will include an annual supplement on various themes. For 1985 the topic is networks. To accomodate this supplement some items have been deleted and other items have been switched from permanent questions to rotating questions.

The items appearing on the surveys are one of three types: Permanent questions that occur on each survey, rotating questions that appear on two out of every three surveys (1973, 1974, and 1976, or 1973, 1975, and 1976), and a few occasional questions such as split ballot experiments that occur in a single survey. A detailed layout of the appearance of questions can be found right before the index to this codebook.

A second objective is the prompt distribution of fresh, interesting, and high-quality data to a variety of users who are not affiliated with large research centers. Pursuant to this end, the Roper Public Opinion Research Center has agreed to reproduce and distribute the data and codebook.

The initial survey, 1972, was supported by grants from the Russell Sage Foundation and the National Science Foundation. NSF has provided complete support for the 1973 through 1978, 1980, 1982, 1983, 1984 and 1985 surveys.

We welcome your participation in this program. While it is not necessary to request permission from NORC before publishing analyses of these data, we do ask that NORC be cited as the source of your data. We also request that copies of reports which utilize the data be sent to the General Social Survey, NORC, 6030 South Ellis Avenue, Chicago, IL 60637.

GENERAL INTRODUCTION

The General Social Surveys have been conducted during February, March, and April of 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1980, 1982, 1983, 1984 and 1985: There are a total of 18,586 completed interviews (1,613 in 1972, 1,504 in 1973, 1,484 in 1974, 1,490 in 1975, 1,499 in 1976, 1,530 in 1977, 1,532 in 1978, 1,468 in 1980, 1,506 in 1982, 354 in 1982 black oversample, 1,599 in 1983, 1,473 in 1984, and 1,534 in 1985). Since 1973, the median length of the interview has been about one hour. Each survey is an independently drawn sample of English-speaking persons 18 years of age or over, living in non-institutional arrangements within the continental United States. Block quota sampling was used in 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and the 1977, 1978, 1980, 1982, 1983, 1984 and 1985 surveys (see Appendix A for a detailed description of the sample design).

The data from the interviews were processed according to standard NORC procedures. Cleaning procedures--utilizing a combination of the coding specifications and the interviewer instructions--were used to check for inconsistent or illegitimate codes (see Appendix B for interviewer instructions and Appendix C for general coding instructions). Some variables--age, occupation, and occupational prestige--are coded so that the first digit of the two- or three-digit codes may be used separately.

This cumulative data set merges all eleven surveys into a single file with each year or survey acting as a subfile. This greatly simplifies the use of the General Social Surveys for both trend analysis and pooling. In addition, this cumulative data set contains items previously available only as supplemental data sets (e.g., the 1982 black oversample). Finally, the cumulative file contains certain items never before available (e.g., the 1982 Ford Foundation questions on the military).

To facilitate the use of the codebook, several terms must be explained. The abbreviation "R," which appears throughout the text and appendices, stands for "respondent." The format which we have used in the text of the codebook is as follows:

84. Do you think the use of marijuana should be made legal or not?

[VAR: GRASS]

RESPONSE	PUNCH	YEAR					COL.62
		1972-1982	1982B	1983	1984	1985	ALL
Should	1	1803	0	324	332	0	2459
Should not	2	5413	0	1222	1074	0	7709
Don't know	8	242	0	52	59	0	353
No answer	9	35	0	1	8	0	44
Not Applicable	BK	6133	354	0	0	1534	8021

The format includes the question exactly as it appeared in the questionnaire. For those few questions that were recoded, the symbol [RECODE] appears immediately after the question; for the original question wording, the user must turn to Appendix D: Recodes. Question numbering as it appeared on the actual questionnaire is given in Appendix B.

"[VAR: GRASS]" refers to the variable name. A mnemonic was assigned to each question to promote standardization in the use of General Social Survey variable names and also to meet the eight character limitation prescribed by computer software systems (e.g., SPSS).

Under the heading "RESPONSE," all possible answers to the questions are listed. The questionnaire contains three alternate forms of response as follows: (1) the answers were read to the respondent (if they were included in the question); (2) answers were presented to the respondent on a card (indicated by interviewer instructions); or (3) answers were marked by the interviewer to best correspond to the answer of the respondent (also indicated by interviewer instructions).

The term "PUNCH" represents the code or numerical value which was assigned to each response. These are the numbers that the user will find punched in the columns within the decks. The frequency of occurrence of each of the punch values appears in the next four columns. The combined marginals across the surveys are in the last column headed "ALL." In most cases, the marginal distributions for all punches are given in the text.

For a small number of variables--the two-or-more-column variables--frequencies or marginal distributions appear in the appendices. Since the responses are mutually exclusive (i.e., only one code can appear for each respondent for each question), the totals of these marginals must always be 1,613 in 1972, 1,504 in 1973, 1,484 in 1974, 1,490 in 1975, 1,499 in 1976, 1,530 in 1977, 1,532 in 1978, 1,468 in 1980, 1,506 in 1982, 1,599 in 1983, 1,473 in 1984, 1,534 in 1985 and 18,586 under "ALL."

The first column under "YEAR," 1972-1982, gives the combined totals for the 1972-1982 cross-sections. In the second column, 1982B, the counts for the 1982 black oversample appear. Blacks who were part of the regular 1982 sample are not part of these figures. The third column, 1983, contains the counts for 1983. The fourth column, 1984, contains the counts for 1984. The fifth column, 1985, contains the counts for 1984. The sixth column, ALL, contains the total for the preceding three columns. For a discussion of the use of the black oversample see Appendix A. For the individual yearly totals for 1972-1982 consult the General Social Surveys, 1972-1982: Cumulative Codebook. To determine what years or surveys a variable appeared in see Appendix Q.

2. A. What kind of work do you (did you normally) do? That is, what (is/was) your job called?

OCCUPATION: [See REMARKS]

B. What (do/did) you actually do in that job? Tell me, what (are/were) some of your main duties?

C. What kind of place (do/did) you work for?

INDUSTRY: [See REMARKS]

D. What (do/did) they (make/do)?

E. (Are/Were) you self employed or (do/did) you work for someone else?

F. (Are/Were) you employed by the federal, state or local government or by a private employer (including non-profit organizations)?

REMARKS: The above questions are not coded but are used to code occupation, prestige, and industry. This survey uses the U.S. Bureau of the Census 3 digit occupation classification for 1970 occupations, the 2 digit Hodge, Siegel, Rossi prestige score, and the U.S. Bureau of the Census 3 digit industrial classifications. Detailed occupational classifications, prestige scores and industrial classifications can be found in Appendices F, G and H. The distributions given below are for first digit of each of the three codes.

[a] A suburb is defined as any incorporated area or unincorporated area of 1,000+ (or listed as such in the U.S. Census PC (1)-A books) within the boundaries of an SMSA but not within the limits of a central city of the SMSA. Some SMSAs have more than one central city, e.g., Minneapolis-St. Paul. In these cases, both cities are coded as central cities.

[b] If such an instance were to arise, a city of 50,000 or over which is not part of an SMSA would be coded '7'.

[c] Unincorporated areas of over 2,499 are treated as incorporated areas of the same size. Unincorporated areas under 1,000 are not listed by the Census and are treated here as part of the next larger civil division, usually the township.

The source of the data is the 1970 U.S. Census population figures published in the PC (1)-A series, Tables 6 and 10. Practically, the codes '6' and '10' are localities not listed in Table 6 (Population of Incorporated Places and Unincorporated Places over 1,000). For the 1980 frame cases analagous tables from the 1980 Census were used.

REMARKS: See Appendix O, GSS Technical Report No. 4.

53. SIZE OF PLACE

Size of Place in thousands--A 4-digit number which provides actual size of place of interview (Cols. 71-74).

Remember when using this code to add 3 zeros.

Listed below are the frequencies for gross population categories.

REMARKS:

This code is the population to the nearest 1,000 of the smallest civil division listed by the U.S. Census (city, town, other incorporated area over 1,000 in population, township, division, etc.) which encompasses the segment. If a segment falls into more than one locality, the following rules apply in determining the locality for which the rounded population figure is coded.

If the predominance of the listings for any segment are in one of the localities, the rounded population of that locality is coded.

If the listings are distributed equally over localities in the segment, and the localities are all cities or towns, or villages, the rounded population of the larger city or town is coded. The same is true if the localities are all rural townships or divisions.

If the listings are distributed equally over localities in the segment and the localities include a town or village and a rural township or division, the rounded population of the town or village is coded.

The source of the data is the 1970 U.S. Census population figures published in the PC (1)-A series, Tables 6 and 10. For cases from the 1980 frame analagous tables from the 1980 Census were used. See Appendix M for changes across surveys.

[a] Deck 3 contains Dictionary of Occupational Titles (DOT) variables for Respondent, Spouse, and Respondent's Father. DOT variables are added to all cases with occupation codes except 580 (former members of the Armed Services) and 590 (current members of the Armed Services). In addition, there is a prestige scale different from the NORC scale. See Appendix I for a discussion of these variables.

Others think that the government should not concern itself with reducing this income difference between the rich and the poor.

Q. 113A,B

113. There are many different ways of picturing God. We'd like to know the kinds of images you are most likely to associate with God.

Here is a card with sets of contrasting images. On a scale of 1-7 where would you place your image of God between the two contrasting images? (HAND CARD T)

The first set of contrasting images shows Mother at 1 on the scale and Father at 7. If you image God as a Mother you would place yourself at 1. If you imagine God as a Father, you would place yourself at 7. If you imagine God as somewhere between Mother and Father, you would place yourself at 2, 3, 4, 5, or 6. (REPEAT EXAMPLE AS NECESSARY FOR EACH ITEM A-F, SUBSTITUTING IMAGES A-F FOR "MOTHER" AND "FATHER".)

Where would you place your image of God on the scale for . . . READ EACH SET OF IMAGES AND CIRCLE ONE CODE FOR EACH.

120. People have different images of the world and human nature. We'd like to know the kinds of images you have.

Here is a card with sets of contrasting images. On a scale of 1-7 where would you place your image of the world and human nature betweeen the two contrasting images? (HAND CARD W)

HAND
CARD
W

Look at the first set of contrasting images. If you think that "The world is basically filled with evil and sin," you would place yourself at 1. If you think "There is much goodness in the world which hints at God's goodness" you would place yourself at 7. If you think things are somewhere between these two you would place yourself at 2, 3, 4, 5 or 6. (REPEAT EXAMPLE AS NECESSARY FOR EACH ITEM A-F)

Where would you place your image of the world on the scale for . . .?
(READ EACH SET AND CIRCLE ONE CODE FOR EACH)

A. The world is basically filled with evil and sin. — There is much goodness in the world which hints at God's goodness.

REMARKS: Card AA contained responses for punches 1-3. See Appendix M for across survey changes. In 1978, this question was asked immediately before Q. 152 (Alienation) for the half of the sample with Form 2. For the half with Form 1, this question immediately followed Q. 152. See Q. 248 for the split-ballot form. In 1984, this question appeared on Forms 1 and 2, and a variant, Q. 163, appeared on Form 3. See Appendix O, GSS Technical Reports Nos. 11 and 49.

163. I am going to name some institutions in this country. Some people have complete confidence in the people running these institutions. Suppose these people are at one end of the scale at point number 1. Other people have no confidence at all in the people running these institutions. Suppose these people are at the other end, at point 7. And, of course, other people have opinions somewhere in between at point 2, 3, 4, 5 or 6. Where would you place yourself on this scale for . . . READ EACH ITEM, CODE ONE FOR EACH. REPEAT THE QUESTION AS NECESSARY.

On each of these cards you see on the right hand side a scale with seven points. The lowest point with number 1 indicates that this aspect of life is unimportant to you. Point 7 at the top indicates that particular aspect of life is very important to you. The numbers in between indicate varying degrees of importance. Please take a look at all the cards first. Then, tell me for each card its letter and the number you've decided on. SHUFFLE THE SET OF BLUE CARDS BEFORE HANDING TO RESPONDENT.

(HAND CARD NN) Some people feel these situations are certain to happen (think of these as point 7 on the scale), others think these situations won't happen at all (think of these as point 1 on the scale). And of course some people have opinions somewhere in between. For each of these possible military situations, please give me your best guess as to how likely it is to happen.

For example, an all-out atomic war. Where would you put the likelihood of an all-out atomic war during the next ten years? (Would you say 7--it is certain to happen, 1--it won't happen at all, or something in between?) (CIRCLE ONE CODE FOR "A" AND REPEAT FOR B-F)

308. And one last question. We all know that American citizens have certain rights. For example, they have the right to free public education and to police protection, the right to attend religious services of their choice, and the right to elect public officials.
I'd like to ask now about certain obligations that some people feel American citizens owe their country. I just want your own opinion on these--whether you feel it is a very important obligation, a somewhat important obligation, or not an obligation that a citizen owes to the country. 309. I'd like to talk with you about issues some people tell us are important. Please look at CARD OO. Some people think that the government in Washington should do everything possible to improve the standard of living of all poor Americans; they are at Point 1 on this card. Other people think it is not the government's responsibility, and that each person should take care of himself; they are at Point 5.

326. We would like to know something about how people go about guessing words they do not know. On this card are listed some words--you may know some of them, and you may not know quite a few of them.

HAND
CARD
UU

On each line the first word is in capital letters--like BEAST. Then there are five other words. Tell me the number of the word that comes closest to the meaning of the word in capital letters. For example, if the word in capital letters is BEAST, you would say "4" since "animal" come closer to BEAST than any of the other words.

If you wish, I will read the words to you. These words are difficult for almost everyone--just give me your best guess if you are not sure of the answer. CIRCLE ONE CODE NUMBER FOR EACH ITEM BELOW.

EXAMPLE

BEAST	1. afraid	2. words	3. large
	4. animal	5. separate

327. SAMPLING ERROR CODE

[VAR: SAMPCODE] COLS. 73-75

The "Sampling Error Code" is provided for the convenience of persons who wish to study within-cluster and between-cluster variation in the GSS. Values of the code range from 101 to 218 and 301 to 384. Values 101 to 201 represent one of the 101 primary sampling units (PSUs) in the 1970 NORC National Sampling Frame. Values 202 to 218 represent the 17 PSUs in the 1980 black samle frame. Values 301 to 384 represent the 84 PSUs in the 1980 NORC National Sampling Frame. Note that not all values in the 301-384 range appear in 1983 because of the split frame design employed that year, see Appendix A for details. Codes are assigned so that one can obtain properly stratified subsamples of PSUs by taking every second (or every nth) value of SAMPCODE.

The "Sampling Error Code" is blank for all 1972 cases, since the 1972 survey did not use the 1970 or 1980 sampling frames.

APPENDIX A:

SAMPLING DESIGN

In the original National Science Foundation grant, support was given for a modified probability sample. Samples for the 1972 through 1974 surveys followed this design. This modified probability design, described below, introduces the quota element at the block level. The NSF renewal grant, awarded for the 1975-1977 surveys, provided funds for a full probability sample design, a design which is acknowledged to be superior.

Thus, having the wherewithal to shift to a full probability sample with predesignated respondents, the 1975 and 1976 studies were conducted with a transitional sample design, viz., one-half full probability and one-half block quota. The sample was divided into two parts for several reasons: 1) to provide data for possibly interesting methodological comparisons; and 2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response patterns. For example, if the percentage of respondents who indicated that they were "very happy" increased by 10 percent between 1974 and 1976, it would be possible to determine whether it was due to changes in sample design, or an actual increase in happiness.

There is considerable controversy and ambiguity about the merits of these two samples. Text book tests of significance assume full rather than modified probability samples, and simple random rather than clustered random samples. In general, the question of what to do with a mixture of samples is no easier solved than the question of what to do with the "pure" types. Investigators who have applied statistical tests to previous General Social Survey data should continue to apply those tests. Investigators who have refrained from applying such tests may now want to perform analyses on the probability subsample. This would, of course, reduce the number of cases by one-half. Whatever choice investigators make, it should be remembered that the two subsamples represent the same universe.

Having allowed for the appearance of all items in the transitional sample design, the General Social Survey then switched to a full probability sample for the 1977, 1978, 1980, and 1982-1985 surveys.

The variable SAMPLE (DECK 13, Col. 70) can be used to separate the block quota and full probability samples on the 1975 and 1976 surveys.

A similar split sample transition design was used in the 1983 survey to measure the effect of switching from the 1970 sample frame to the 1980 sample frame. Half of the sample was drawn from the old (1970) frame and half was drawn from the new (1980) frame. The variable SAMPLE (Deck 13, Col. 70) separates cases from these two sample frames. More details on the 1970 and 1980 sample frames as well as the block quota samples appear below.

The universe sampled in these studies is the total noninstitutionalized English-speaking population of the continental United States, 18 years of age or older.

BLOCK QUOTA

The sample is a multi-stage area probability sample to the block or segment level. At the block level, however, quota sampling is used with quotas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-at-homes which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to canvass and interview only after 3:00 p.m. on weekdays or during the weekend or holidays.

This type of sample design is most appropriate when the past experience and judgment of a project director suggest that sample biases are likely to be small relative to the precision of the measuring instrument and the decisions that are to be made.

Selection of PSUs

The Primary Sampling Units (PSUs) employed are Standard Metropolitan Statistical Areas (SMSAs) or non-metropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection.[1]

Selection of Sample within PSUs

The units of selection of the second stage were block groups (BGs) and enumeration districts (EDs). These EDs and BGs were stratified according to race and income before selection.[2]

The third stage of selection was that of blocks. The blocks were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting.

[2] Ibid.

The average cluster size is five respondents per cluster. This provides a suitable balance of precision and economy.

Interviewer Instructions

At the block or segment level, the interviewer begins a travel pattern at the first DU (dwelling unit) from the northwest corner of the block and proceeds in a specified direction until the quotas have been filled.

The quotas call for approximately equal numbers of men and women with the exact proportion in each segment determined by the 1970 Census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed women in the location. Again, these quotas are based on the 1970 Census tract data. For men, the added requirement is that there be the proper proportion of men over and under 35 in the location.

These particular quotas have been established because past experience has shown that employed women and young men under 35 are the most difficult to find at home for interviewing.

Sampling Error

Although the mean squared error cannot be estimated directly from a quota sample, one can make estimates of sampling variability using procedures such as those outlined by Stephan and McCarthy.[3] Past experience would suggest that, for most purposes, this sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases. In making this judgment concerning the design effect, we are concerned with the "average" effect upon a large set of different variables of the clustering of households at the last stage of selection. Any statement of sampling error assumes that the bias in quota sampling due to the lack of control over respondent availability is slight for the study under consideration.

For those persons interested in investigating the within-sample variability of these data, we have included a "sampling error code" (see Q. 57). Information about the use of this code is available from the GSS project staff at NORC.

Probability, 1970 Frame

The NORC national probability sample is a stratified, multistage area probability sample of clusters of households in the continental United States.[4] The selection of geographic areas at successive stages is in accordance with the method of probabilities proportional to size (p.p.s.). Furthermore, the clusters of households are divided into replicated subsamples in order to facilitate estimation of the variance of sample estimators of population characteristics.

At the first stage of selection, Standard Metropolitan Statistical Areas (SMSAs) and nonmetropolitan counties covering the total continental United States were grouped according to size strata within the nine Census regions. All population figures and other demographic information were obtained from 1970 Census reports. Within each size stratum grouping based upon geographic location, or racial characteristics (or both), was accomplished before selection. The final frame was further separated into zones or "paper strata" of equal population size in order to facilitate the selection of replicated subsamples of primary sampling units (PSUs).[5] The selection of PSUs was designed to produce four independent subsamples of equal size. The four subsamples were randomly combined to form two larger subsamples of 101 PSUs each.[6] The large subsamples are thus internally separable into two replicated subsamples for variance estimation purposes.

NORC has selected one of the two large subsamples described above to serve as its principal frame of households for the remainder of the decade. The PSUs fall into 89 distinct SMSAs and nonmetropolitan counties. (New York, a very large SMSA, represents five PSUs, whereas the smaller counties represent only one PSU.)

---

[4] Alaska and Hawaii are not included in this sample.

[5] The selection methods used are similar to those described in standard textbooks, e.g., W. E. Deming, Sample Design in Business Research (New York: Wiley & Sons, 1960), and L. Kish, Survey Sampling (New York: Wiley & Sons, 1965).

[6] In the actual implementation of the selection method, subsamples 1 and 4 resulted in 51 PSUs, whereas subsamples 2 and 3 produced only 50 PSUs. The result was not unexpected and is due to a technical reason, details of which will be provided on request. The inequality of subsample sizes does not affect the equal probability characteristics of the sample.

The second-stage procedure involved the direct selection of Census block groups or enumeration districts (E.D.s) within SMSAs or counties, eliminating the traditional intermediate stage of clustering selections within urban places or county division. The increase in geographic dispersion within the primary areas has a negligible effect on field costs. Before selection, the Census tracts, minor civil divisions, and Census county divisions containing the block groups and E.D.s were carefully stratified by geographic location, income, and race, in order to maximize the precision of sample estimation within a PSU. Block groups and E.D.s were then selected with probabilities proportional to size in numbers sufficient to satisfy survey demands for households expected throughout the decade. Lists of the separate households contained in the second stage blocks or E.D.s were constructed by field personnel or obtained from directories. Thus, the principal NORC national probability sample is, in effect, an inventory of identifiable households, each with a known probability of selection.

In a typical sample survey with equal probability of selection for individual households (i.e., a self-weighting sample), households at which interviews will take place are probabilistically selected from the available lists of addresses for blocks and E.D.s. The method of probabilities proportional to size results in the assignment of approximately equal numbers of interviews in each final stage cluster, which in turn leads to increased precision in the estimation of overall population characteristics.

The NORC national probability frame, with its broad geographic dispersion, its reserves of additional SMSAs and counties, and its built-in replication, provides sufficient flexibility for application to a wide range of survey tasks. Its design is based on the consideration of sampling problems that NORC and other organizations have encountered in past sureys, and we believe that it substantially eliminates many of these difficulties.

Probability, 1980 Frame

1980 National Sampling Frame

The 1980 frame was designed, selected, and listed jointly by NORC and the Survey Research Center. The new frame was selected, in most cases, in two stages; about one-fifth of the second stage units were subsampled, producing a third stage.

Eighty-four PSUs were selected at the first stage. The PSUs consist of counties, SMSAs, independent cities and, in New England, parts of counties. Prior to selection, the continental United States was divided into PSUs; the PSUs were then grouped into 84 strata. The strata were formed by grouping metropolitan and non-metropolitan PSUs within each of the four Census regions. Within each region, additional variables were used to define strata. The stratifying variables included within-region geography and size; size was measured by the 1980 Census count of occupied housing units. One PSU was selected from each stratum using a controlled selection procedure. This procedure ensured proportionate representation along certain control dimensions (such as percentage Hispanic in the West). The exact control variables (like the stratification variables) differed somewhat from region to region. Sixteen strata contained only one PSU, which was selected with certainty. The remaining 68 PSUs were selected with probability proportional to size (measured in housing units).

The unit for second stage selection was the block or enumeration district (ED). The number of secondary selections within a PSU depended in part on the stratum size. The number of second stage selections listed for NORC's national frame in the 16 PSUs selected with certainty ranged from 24 to six selections for PSU. In the remaining 68 sample PSUs, six second stage selections were listed. (The same number of second stage selections were listed for SRC's national frame; further, both organizations retained a similar number of second stage selections as a reserve for future use.) All total, the new frame includes 562 secondary selections.

Prior to selection, the second stage units within each sample PSU were sorted by county, by minor civil division (in some areas), by Census Tract or ED number, and by block number. Counties were ordered within PSUs according to size and geography (e.g., in SMSAs, the county containing the central city came first, then counties containing nearby suburbs, and so on). In twenty states, information was available on the size and median family income of minor civil divisions (MCDs), which are governmental units below the county level (such as cities or towns). Where this information was available, we sorted the block and EDs by MCD and ordered the MCDs by size and income. Next, we sorted all blocks and EDs by Census Tract number and then by block or ED number; these sorts establish a geographic ordering. The secondary selections were made using systematic zone selection; the probabilities of selection were proportional to size (measured in housing units). Each secondary selection included at least 50 housing units.

In enumeration districts and blocks with a large number of dwelling units, a third stage of selection was carried out. The block or ED was subdivided into pieces which were "field counted" by field staff from NORC or SRC. In a field count, an area is scouted and a rough count of the number of housing units is made. Based on the field count we selected a piece of the sample block or ED with probability proportional to its size.[7]

Comparison of the 1970 and 1980 Frames

Table A.1 summarizes the main differences between the old and the new frames. Aside from the obvious differences in the number of selections at each stage and in the measures of size (people vs housing), the two frames differ in three main respects. First, the stratification variables differ. In particular, percentage Black, which was used as an implicit stratifier at the first and second stages in the old frame is no longer used in the new sample (except in rural areas of the Deep South). Instead, the new frame uses a variety of geographic control variables at both the first and second stages. Second, the new frame was, for the most part, selected in two rather than three stages. A third stage was used only to subsample within blocks and EDs too large to be listed in a single trip to the field.

Table A.1

Measure of Size	Housing units--at least 100	Housing units--at least 50
Method of Selection	One selection with probability proportional to size	One selection with probability proportional to size

The most important change involves the method of selection at the first stage. The new frame used a controlled selection procedure that assures proportionate representation along the control dimensions as well as the dimensions used to define strata. This procedure should yield additional statistical precision (Leslie Kish estimates the gains at up to 20%). An added benefit of controlled selection from explicit strata is that it allows us to use the Keyfitz procedure to draw a new national sample. The Keyfitz procedure is a method for updating national samples using new Census data; it maximizes the retention of PSUs from an existing national sample. It could not be easily applied to a sample drawn using systematic selection procedures (such as the old frame). The controlled selection procedure used to select the PSUs has one drawback--it will be more difficult to subsample PSUs. The zone selection procedure used to select the old frame is easy to select a half-sample; in fact, the old frame was selected in two replicates. Subsampling is not such an automatic procedure with the new frame.

1983 GSS Sample. Fifty PSUs from the new frame were selected for the 1983 GSS. All 16 certainty PSUs were selected for the GSS subsample. The remaining 68 PSUs were paired, according to size and region; one PSU was selected at random from each pair. Within each of the 50 subsample PSUs, half of the segments (a total of 141) were selected systematically for the 1983 GSS. Fifty PSUs were also selected from the old frame with three segments per PSU (total of 150).

A detailed empirical analysis of the 1970 and 1980 samples on the 1983 survey will be prepared as part of the GSS Technical Report Series.

1982 Black Oversamples

In 1982 the National Science Foundation funded as a separate project an oversample of Blacks on the GSS. Two different sample frames were used. First, an additional sample of lines were drawn from the 1970 sample frame (as the regular 1982 GSS cross section was). These households were screened for race and eventually yielded 107 extra Black respondents. Second, a special sample frame designed to sample Blacks was drawn from 1980 Census data. In this sample frame localities were selected according to their Black population rather than their total population. This procedure increases the take-rate among selected lines yielding a more efficient sampling of Blacks. This oversample proportionate to the Black population resulted in 247 extra Black respondents. In all the Black samples added 354 extra Black respondents. When added to the 156 Blacks who were part of the regular cross section, that made a total of 510 Black respondents in 1982.

The three groups of Blacks can be added together to form a national probability sample of Black Americans. The Blacks and Non-Blacks in the regular 1982 cross-section can be used as a national sample of all races without using the OVERSAMP (DECK 12, Cols. 74-78) weight. If one wants to use all 1982 cases to form a national sample (the 1,506 from the cross section and the black oversamples of 354) then the OVERSAMP weight must be used establish the proper racial balance. The OVERSAMP variable is designed to match the racial distribution found in the regular cross section and reproduce the total number of unweighted cases (i.e. 1,506 + 354 = 1,860).

A detailed report on the black oversamples including a comparison of the two methods of oversampling blacks is being prepared by A. Wade Smith, Martin Frankel, and Roger Tourangeau.

Information on response rates is given in Table A.2.

APPENDIX B:

FIELD WORK AND INTERVIEWER SPECIFICATIONS

This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary. The sampling procedures were reviewed by having interviewers take a training quiz after they had studied the sampling instructions specific to this study (see Appendix A for a discussion of the sample). Around the same time, publicity materials were sent to area supervisors; these included letters to be mailed locally to the Chief of Police, the Better Business Bureau, the Chamber of Commerce, and the various news media.

After these steps were completed, interviewers received materials needed for data collection (assignments, specifications, blank interview schedules). Each interviewer completed one practice interview which was evaluated at NORC. Actual interviewing then commenced; completed interviews were immediately returned to NORC where they were edited for completeness and accuracy. Twenty percent of the interviews were validated. Feedback on specific problems was given to individual interviewers and on general problems to all interviewers.

Once field work was completed, the edited questionnaires were coded and keypunched, and the resulting data were cleaned (see Appendix C: General Coding Instructions).

The following section contains the interviewer specifications in one continuous listing. Originally, the specifications were communicated to interviewers by means of an annotated interview schedule and memoranda on specific interviewing problems. The specifications inform the interviewers of the intent of the question, provide caution signals where a potential problem may exist, and recommend probes or provide interpretations which can be suggested to the respondent should the respondent have difficulty in understanding the question. All the specifications work toward increasing the internal validity of the data collected.

Questions which has no specifications are not included in this section. If a specification or explanation modifies an entire question, the question is not repeated here. If a specification modifies one response category, or only one section of the question, the modified portion is repeated here and appears in brackets "[ ]."

The questions appearing in this codebook are numbered sequentially. There is some discrepancy between this sequence and the way in which they appeared in the original questionnaire. A few of the questions included in the original questionnaire are not part of the General Social Survey. Others, such as the demographic items, which were originally spread throughout the questionnaire, have been grouped into Deck 1 and the first half of Deck 2. Other questions are grouped by topic. Listed below are the codebook question numbers and the corresponding question numbers from the original questionnaire.

Specifications from the most recent survey are given first. Earlier specifications are given next. Notes about additions, omissions, etc. refer to the immediately preceding entry. "None" means that no specification was used that year. Questions not listed below have never had specifications.

Question Number

Interviewer Specifications

1978, 80, 82, 83, 84, 85

1 Accept R's definition of working full time or part time. Do not define these terms for R. By "working" and "job" we mean: working for pay at a job, or running his/her [one's] own business or profession (or farm), or working without pay in [a] family farm or business.

[SMALLEST CODE NUMBER] Example: If R was working part time and also going to school, circle [code] "2."

1977, 82, 83

Adds [Other] example: "disabled."

1976

Adds "or 'too ill'" to last line.

1973-75

Let the R decide if R was working full or part time.

If R was working part time and was also going to school, circle code 2.

By job, we mean: working for pay at a job or running own business or profession (or farm), or working without pay in family business (or farm).

"Other" might be disabled or too ill to work.

1972

For example: If working full time and part time, code "1." If working part time and in school, code "2."

[other (SPECIFY AND ASK A)] For example: Might be disabled or too ill to work.

Question Number	Interviewer Specifications
	1982, 83, 84, 85
2A-E	[did you] Use[d] [only] if not curently working. If R is retired from one occupation, but now working at something else, record current occupation. Probe for full description of occupation and see spex for Q. 6.
	1976-78, 80
	[did you normally] Used if not currently working. If R is retired from one occupation, but now working at something else, record current occupation. Probe for full description of occupation and industry. [and] See instructions, Q. 6.
	1974-75
	[did you normally] only used if not currently working. If more than one job--probe for main job--one that R considers most important. See Question 6 for interviewer instructions on job descriptions. This question applies also to people who may be retired from one occupation, but are now working at something else. We want what they are doing NOW.
	1972-73
	[did you normally] only used if not currently working. If more than one job--probe for main job--one that R. considers most important. See Question 6 for interviewer instructions on job descriptions.

	1982, 83, 84, 85
3	[married] Include legal marriage or living together as married. Accept R's definition of "married." [separated] Includes informal as well as legal separation.
3A	If necessary, probe for approximate age: For example: "About how old were you?"
3B	[legally] legal separation gained through a court.
	1976-78, 80
3	[Separated] Includes legal as well as informal separation. (1980, switches order of legal and informal)
3A	If necessary, probe for approximate age: "About how old were you . . . ?"

Question Number — Interviewer Specifications

1975

3A Probe for approximate age, if necessary. For example: "About how old ...?"

3B Here we only want legal separation gained through a court.

1972-74

Omits 3B.

1985

See Q. 1 for spex.

1982, 83

4 See Q. 1 spex.

1978, 80, 84

See Q. 1 for instructions.

1973-77

Same instructions as for Q. 1.

1972

See interviewer instructions for Q. 1.

1978, 80, 82, 83, 84, 85

5 See Q. 2 for instructions. Read "your husband" or "your wife" as applicable. (82 reads: See spex for Q. 2)

1977

See instructions for Q. 2. Read "your husband" or "your wife" as applicable.

1976

See instructions for Q. 2. For "spouse," read "husband" or "wife" as applicable.

1973-75

See instructions for Q. 2.

1972

[Spouse] Read husband or wife as applicable.

See question 2 for interviewer instructions.

Question Number

Interviewer Specifications

1976-78, 80, 82, 83, 84, 85

6A-E [FATHER SUBSTITUTE] Read "stepfather" or "uncle," etc. if R. did not live with own father.(82, 83, 85: If R did not live with own father, read "Stepfather, [or] uncle, etc.")

Probe for full description of occupation and industry. It is important to get the kind of business or industry, and to get it crystal clear. The name of the company or employer is not necessary and in most instances will not tell us what the respondent actually does in his job. The kind of business or industry is crucial to our properly classifying the job.

It is important that we have detailed information concerning the kind of business. A description such as "automobiles" is far from sufficient--this could mean an auto factory, a new car dealership, a used car lot, a car rental agency, a car wash, a car repair shop, an automobile importer, or something else. Probe fully using sub-questions A through E to find out exactly what kind of business or industry it is.

Respondents, of course, have no way of knowing that the classifying of occupations is very difficult and we need all the information we can get. It is your job to obtain the information. To give you an idea of the difficulty involved, the Bureau of the Census lists 91 different types of "laborers." How can we properly classify the respondent if all we have to go on is "laborer" as a job description? If you find out just what it is that he [82, 83, 84, 85: the person] does as a "laborer," then we can properly classify him [82, 83, 84, 85: him/her].

Don't be content with a job title. "Maintenance man [82, 83, 84, 85: person]" could mean a person [82, 83, 84, 85: someone] who maintains large and complicated machinery, or a janitor, or something else. Find out what he [82, 83, 84, 85: he/she] does as a maintenance man [82, 83, 84, 85: person]. "Office work" can mean supervising typists, being a typist, being a file clerk, supervising the entire office, or something else. Find out what he [82, 83, 84, 85: he/she] does in the office.

"Farmer" is definitely not a good description. It is incomplete because the person may . . .
--own a farm,
--or rent a farm,
--or be a sharecropper (working on someone else's land for a share of the crop or a share of the value of the crop),
--or work without pay on his [82, 83, 84, 85: his/her] family's farm,
--or be a farm laborer for wages,
--or be a foreman on a farm.

Question Number

Interviewer Specifications

6A-E (Cont.) When you receive the response "farmer," find out which of these possibilities applies to the person, so we can properly classify his [82, 83, 84, 85: his/her] occupation.

If father, or father substitute, had more than one kind of work while R. was growing up, ask for work around the time R. was 16 years old. If more than one job at that time, probe for the [82: "the" omitted] main job, i.e., the [82, 84, 85: "the" omitted] job at which person spent most hours.

1973-75

If father or father substitute had more than one kind of work, ask for work around time R. was 16. If more than one at that time, probe for main job.

This occupation question has been slightly reformatted. As always, we need a complete description of occupation and industry. The order in which you get the information asked in A through D does not make any difference--the important thing is that it is all there.

It is important to get the kind of business or industry, and to get it crystal clear. 1972-75

If there is no doubt as to R's race, code without asking. If you have any doubt, ASK.

Please study the following guidelines for classification of race, as derived from Census definitions. If, in the interview situation, you have any reason to be unsure of the respondent's race, according to the definitions given here, ask the question as printed in the questionnaire. Then record the response verbatim and circle the appropriate code and check the box provided.

A person should be classified as OTHER only if he is American Indian, Japanese, Chinese, Filipino, Asian Indian, Korean, Polynesian, Indonesian, Hawaiian, Aleut, or Eskimo.

A person is classified as BLACK only if he is American Negro; or if he is African, West Indian, or Puerto Rican, and also appears to be black.

All other persons are classified as WHITE. This includes Mexicans, Spaniards, and also Africans, West Indians, or Puerto Ricans who appear to be white.

1972

37,38,39,42 (Cont.) Omits: Last paragraph.

1982, 83, 84, 85

38,41 This Q. is concerned with income from occupation described in Q. 2 rather than a specific job or employer, i.e. [1985: Substitutes "Example:" for "i.e."] If R's occupation is "sales clerk" you would ask for total income in 19[84] as a "sales clerk" even if R worked in several different places during the year. [1984, 85: Record R's income only from job described in Q.2, not from any other jobs or sources.]

1977-78, 80

Record Rs income only from job described in Q. 2, not from any other jobs or sources. This question is concerned with OCCUPATION, rather than specific job or employer. EXAMPLE: If Rs occupation was "waitress," you would ask for total income in 197(6) as waitress. . . even if she worked in several different places during the year.

1976

Note instruction: SEE Q. 2. IF ANY OCCUPATION RECORDED, ASK Q. 37. Read job title from Q. 2. Record R's income only from job described in Q. 2, not from any other jobs or sources. This question is concerned with OCCUPATION, rather than specific job or employer. EXAMPLE: If R's occupation was "waitress," you would ask for total income in 1975 as a waitress...even if she worked in several different places during the year.

1974, 75

NOTE INSTRUCTIONS. Read job title from Q. 2. This question is concerned only with any income R. earned from occupation described in Q. 2, not any other income from other sources or income of other family members.

[Negro/Black] In this and future questions, choose the word you think the R would be most comfortable with.

1972

None.

1972

134 See Q. 21 for interviewer instructions on race. If you are in doubt as to R's race, you cannot ask at this point. Either ask or skip this series using your best judgment.

Question Number	Interviewer Specifications
134 (Cont.)	Note instructions: Qs. 122-131, 134 are not asked of black Rs because they are trend questions, which have been asked in many previous surveys of whites only. These questions could be meaningless or insulting to black Rs.
	1982
136	If not sure, code best guess.
	1982

Question Number

Interviewer Specifications

1980

169 Make sure R understands the difference between the alternatives as "parents teaching children to think for themselves" and "parents teaching children to do what the parents think is right." R may want to say "both" to this question, but try to force a choice. If R says it depends upon the age, the earliest type of training is what we want.

1978, 82, 83, 85

170 [relatives; parents; brother or sister] This refers only to relatives living outside R's household.

1977

[relatives] relative who lives outside R's household.

1975

That is relatives who live outside R's household.

1974

[RELATIVES] That is, relatives who live outside R's household.

1977-78, 80, 83, 84

172 If R asks, "organizations" refers to groups that have characteristics such as newsletters, dues, meetings, etc.

1977, 78, 82, 83, 85

179 [If R has a job. . . Ask] NOTE!

1982-85

180 [work you do] Refers to satisfaction with job itself, not how R performs job. NOTE: Persons coded "keeping house" are also asked this question.

1978, 80

Refers to job itself, not how R performs job.

1977

Refers to job, not how R performs job.

1976

This question refers to satisfaction with job itself--not Rs feelings about how well or poorly he does the job. If "keeping house," question refers to satisfaction with that work.

1975

Omits 2nd sentence.

1972, 74

None.

1978, 80, 82-85

188 [family] Family (82: "family" omitted) refers only to immediate family (1982, 83: living) in the household--not family living elsewhere. In a single person household, this Q. refers to that person only.

1982

189 [very smallest amount of income per month] stress.

1976-77, 80, 82, 84, 85

190 Consider SKIP instruction (1982, 84: Replace first three words with "read") carefully to determine whether Qs 190 and 191 are asked of R, R's spouse, or whether Qs should be skipped.

[Do you] If respondent is currently working, ask Qs 190 and 191 of R, regardless of marital status.

[supervisor] also means "person in charge," "person you report to."

[that person] means R's supervisor.

1972-74

Read phrases in parentheses only if asking about spouse.

Supervisor on your job may be explained as boss, person in charge or person you report to.

[that person] R's supervisor--does R have someone R reports to?

1977, 80, 82, 84, 85

190, 191 Qs. 190 and 191 are designed to locate R (or spouse if R is not working) in a work hierarchy or chain of command.

212 (Cont.) If R says "lots" or "dozens," probe: "Well, about how many would you say?"

1972, 74, 75

Probe if necessary: "For most people. . ." Use the code [seven or more] only if a number is given (seven or larger number) not for vague responses like "dozens" or "lots." Probe such vague responses: "Well, about how many would you say?"

Probe once before accepting the response [as many as you want].

1978, 82, 83, 85

213 If R has no children, ask: "Do you expect to have any children?"

If R is currently pregnant, code "yes" without asking and ask A & B:

A. "How many more children do you expect to have?"
B. "How many more in the next five years?" (omitted in 1982)

Include MALE Rs.

If R is elderly and comments that the question is inappropriate, just explain that you are instructed to ask the question of everyone.

1977

If R has no children, ask: "Do you expect to have any children?"

If R is currently pregnant, code "yes" without asking, and ASK A and B, "How many more children do you expect to have?" and "How many more in the next five years?"

1972, 74, 75, 76

You may not want to ask this [question] of a 70 year old widow, but do ask of everyone who could possibly have children in the future--regardless of sex or marital status.

If your R is an obviously pregnant [woman], [you may] code yes without asking; [then] ask A and B.

Use the word [more] if R has ever had children.

315 Question 315 is modeled after a mileage chart. If you wanted to find the distance between Chicago and Boston on a mileage chart you would look along the vertical axis for Chicago, along the horizontal axis for Boston and find the intersection. See Figure 1. Voila! You found it. It's 1004 miles from Chicago to Boston.

FIGURE 1

[SHOWS MILEAGE GRID]

We realize that the grid in Question 315 is new. Imagine a respondent names 4 people in Question 313: Bob, John T., John R., and Mary. We want to ask Question 315 for each possible pair of these 4 people. First we pair each with Bob. The pairs are: Bob and John T., Bob and John R., and Bob and Mary. Then we pair everyone except Bob with John T. The pairs are: John T. and John R., and John T. and Mary. The only pair left is John R. and Mary. See Figure 2.

315 (Cont'd)	Write names 1-5 across and 2-5 down. If less than 5 names cross out unused rows. After you write names in the grid, return to page 313 and ask Qs. 313 and 313A.
316-323	1985 Use abbreviated form of these questions after you ask them for the 1st person. Repeat categories only as needed. It is not necessary to read everything over and over.
316	1985 Ask Q. 316 for each person before going onto Q. 317. Continue this pattern through Q. 323.
318	1985 If R says "Don't know" for a particular category, write DK here, on dotted line, next to appropriate category and record verbatim.
319	1985 [talk] "talk" includes phone conversation.
320	1985 [highest level of education] highest level completed.
321	1985 Code middle range given. Example: "He's in his mid-fifties." Code 55.
326	1982, 84 If R [1984: is] not sure, probe for best guess. 1978 None. 1976 If R is having difficulty, reassure him/her that these are difficult words for most people, and ask him to guess if not sure. 1974 Note: Don't let R take lots of time on this question. Emphasize that most people don't know many of the words and we want his best guess. Read words to R, if you think R has difficulty reading. Note: We ask the R to tell you the number of the word. That is because he may not be sure how to pronounce the word and be embarrassed to say it to you. If R refuses to guess, code 9. Note: Code numbers are to the left of categories in this question. Circle them as you would usually. In coding, be sure you know which word R is responding to. You may have to read the CAPITALIZED word aloud, to be sure you and the R are on the same line.

APPENDIX C:

GENERAL CODING INSTRUCTIONS

The coding specifications are the work rules for coding the information collected by the interviewers. Although many questions are coded independently, others link up with a network of questions--and the networks must be internally consistent. For example: If no father or father substitute is given for Question 24, column 10, all questions which refer to father or father substitute (e.g., father's occupation or education) must be coded as "BK" (blank). Other networks include questions relating to marital status and labor force status. The coder specifications instruct the coders to watch for interconnections both within questions and within networks of questions.

The internal consistency of these networks has been incorporated into the NORC cleaning specifications. These cleaning procedures are computer programs which test for the logical consistencies set up in the coding specifications. When inconsistencies are found, they are printed out as error statements and are then corrected. Coding and cleaning specifications are used jointly to help insure the integrity of the data.

For detailed information on data cleaning at NORC, see the following:

Winona Adkins: EDIT--The NORC Cleaning Program: A program to develop a sequential file. Chicago, NORC, Revised April, 1975.

GENERAL CODING INSTRUCTIONS

A. Coding must be done in red pencil.

B. Never erase any interviewer-circled codes or comments. If the questionnaire must be corrected, draw a line through the code circled in error. Do not make it impossible to read what was done originally. Please note that green marks are field department corrections.

C. Every column must have a code, and no column may contain more than one clearly circled code.

D. For those questions noted FLAG: this instruction applies to questions where special coding problems have been anticipated. Coders wil be provided with a supply of little clips (flags) to attach to the page where the problem occurs. Coders may also flag all other areas in the questionnaire where information is incomplete or unclear, and requires the supervisor's attention.

E. For those questions noted LIST: record on an "OTHER" list form the questionnaire identification and all verbatim comments relating to the response to be listed. A separate list should be kept for each question. If, however, a question has more than one listed code, keep a separate list for each code. Record at the top of each form the study number, the question number, the deck and column number, and the listed code. In most surveys, all "Other (SPECIFY)" codes are listed.

F. The "no answer" (NA) and "refusal" code for this questionnaire is '9' in a one-column field, '99' in a two-column field, etc. NA is coded when the respondent does not give an answer, when the interviewer fails to ask a question or to record the answer, when the written information is contradictory or too vague to code, and when the coder needs to supply a code in order to resolve a tricky skip pattern. NA is allowed for every question except those specifically excepted in the codebook, such as race and sex.

G. The "not applicable" (NAP) code is "R," which means "reject" or "blank" to our keypunchers. NAP is coded when a question was not supposed to have been asked (i.e., because of directions to skip it).

H. If "don't know" (DK) is not a preprinted code, then DK is coded '8' in a one-column field, '98' in a two-column field, '998' in a three-column field, etc. If DK has been listed along with other responses in one question, edit out (or do not code) the DK response.

I. A filter question is one that determines whether or not a series of other questions, dependent on the filter question, should be asked. On the basis of the response to the filter question, the interviewer is instructed either to ask the dependent questions or to skip them. Generally, the interviewer is instructed to skip the dependent questions if the answer to the filter question is "no" and to ask these questions if the answer is "yes". A dependent question can, itself, function as a separate filter question that governs a different skip pattern.

The interviewer's skip instructions have been restated in the codebook in terms of codes. Coders should code "not applicable" (NAP) for questions that were to have been skipped by the interviewer. Questions that are not to be coded NAP (not to have been skipped by the interviewer) must have either "answer" or "no answer" (NA) codes.

If the filter question is coded NA, all dependent questions must be coded NA, unless the dependent questions contain valuable data--in which case the supervisor should select what data are to be kept. If more than one response is given to the filter question, or if the filter question was left blank, the supervisor should examine the dependent questions to determine what should be coded for the filter question. If a code for the filter question still cannot be determined, code the filter question NA.

The object of editing filter questions is to make the data fit into the correct skip pattern. However, this is to be done in a logical fashion, i.e., never falsify or inflate the data just to make them fit. You may, in order to make the data match the skips, exchange "no answer" and "not applicable" codes with wild abandon. Be careful when you are eliminating real data. Make sure it is unnecessary or duplicated elsewhere or trivial or wrong. Settle your doubts about inconsistencies with the supervisor. When you are coding in real data, make sure you have grounds for your assumptions.

J. For those questions noted precoded: The interviewer's definition of a precoded question is one in which the answer categories are read as part of the question. The interviewer is instructed to circle the corresponding response code. If more than one code has been circled, but the respondent's remarks have been written in, or if one code has been circled, but the interviewer's comments are inconsistent with the circled code, flag the question. If the response is uncodeable, code NA.

K. For those questions noted field-coded: The interviewer is instructed to record the respondent's answer verbatim and then to circle or write in the appropriate code. If the response is in the same words as the code categories, the interviewer has the option of not recording verbatim, but simply circling the code number as in the handling of precoded questions. If no codes have been circled, code the verbatim response. When the verbatim response is inconsistent with the circled or written codes, code the verbatim response.

L. For those questions noted zero-fill: Make certain that the numbers are readable, edit all answers so that the units digit is furthest to the right, and enter '0's to the left of the first significant digit until the entire field of columns is filled. If the answer is "none," code '0' in all columns. Rounding instructions are as follows:

Fractions -- Code whole numbers only--drop any fractions

Ranges -- If a range is given (e.g., 8-10), code the mid-point. IF the mid-point of a range is between two consecutive numbers, code according to the rule for rounding fractions.

The highest codeable number in a one-column field is given in the codebook at each question. The highest codeable number in a two-digit column field is '96,' in a three-column field '996,' etc. List all answers that exceed the highest codeable number.

M. For those questions noted code as many as apply: These are precoded, field-coded, or open-ended questions which have been designed to allow multiple responses by assigning each code a column. All responses not chosen must be coded NAP. If the entire question was left unanswered, code all columns NA.

N. For those questions noted code up: If there are more responses than columns set aside, code the responses which are highest on the list of codes (lowest code numbers).

O. For those questions noted flip a coin: If there is a consecutive multiple response in the same category (e.g., 1 = agree strongly, 2 = agree slightly; but not 2 = agree slightly, 3 = disagree slightly), the coder will flip a coin to determine which answer is to be edited out.

P. For those questions noted code up to number(s): These questions are field-coded or open-ended questions which have been designed to allow multiple responses. Code (or make sure the interviewer has coded) the first item mentioned by the respondent in the first column(s) set aside for the answer; code the second item mentioned in the second column, and so on. If there are fewer items mentioned than columns set aside, code the rest of the columns NAP. If there are more items than columns set aside, coders may be instructed in the codebook to list those items left uncoded.

APPENDIX D: RECODES

Recoding was done on questions when the original data format seemed inappropriate, awkward, or too liberal in its use of columns. Some questions which were originally designed as two column questions were recoded into one when the responses indicated that the second column was unnecessary. Other variables were recoded into their desired final format. Education, for example, required several questions to elicit adequate information for the final recoded two variable formats (years of schooling and degrees received).

The following section includes for each variable: the major reason for recoding; the method of recoding; and the question as it appeared on the questionnaire. This section includes all variables which are referred to by [RECODE] in the codebook. The question number, listed under each variable, indicates where the recoded question can be found in the codebook.

AGE RECODE

(Q. 9; Deck 1, Cols. 56-57)

Intent of Recode

In an attempt to maximize the validty of the responses, theinterviewer asked for the date of birth rather than the age of the respondent. This format, however, necessitated a recode into the more workable two-column code of exact age.

Method of Recode

The respondent's age was calculated by subtracting the year of birth from the survey year. The results of the subtraction were entered into Cols. 56 and 57. Ages of 90 and over were recoded into 89.

Original Question

9. 1972-1975
   In what year were you born?

   1976-1985
   What is your date of birth? ☐☐ ☐☐ ☐☐☐☐
   MONTH DAY YEAR

ASTROLOGICAL SIGN RECODE

(Q.11; Deck 1, Cols. 62-63)

Intent of Recode

For users interested in examining astrological properties, birth date was recoded into the twelve signs of the zodiac.

Method of Recode

Birth date was mapped according to the following recode.

Birth Date	Sign
March 21 - April 19	Aries
April 20 - May 20	Taurus
May 21 - June 21	Gemini
June 22 - July 22	Cancer
July 23 - August 22	Leo

November 22 - December 21	Sagittarius
December 22 - January 19	Capricornus
January 20 - February 18	Aquarius
February 19 - March 20	Pisces

Original Question

See Age Recode.

EDUCATION RECODE

(Qs. 12-19; Deck 1, Cols. 64-75)

Intent of Recode

The education data, as originally designed, were to consist of two independent variables. The first, a continuous variable, would represent the number of years in school, and the second, an ordinal variable, would indicate degrees actually received. Ease of handling and a desire to make use of continuous data where present motivated this two-variable design. Certain alterations to this design were made to facilitate the interviewing process. Recoding was then necessary to reconcile the data with the original design.

Method of Recode

For the continuous variable, years of schooling, the exact number of years was coded for 00 to 12 years for questions 12-19A and 13-20 for questions 12-19C. These data were combined into one continuous scale.

For the second variable, degrees received, the degree marked represents the highest degree actually received. The variables for degrees and years of schooling were independently collected and coded--one was not generated from the other.

Blanks in the original data, denoting "not applicable," have been recoded to '97' for the years of schooling variable and '7' for the degrees received variable. This was done for the convenience of persons who use computer programs which read blanks as zeros.

Original Question

While only the "Father's education" question is shown, Mother's, Spouse's and Respondent's education were collected with the same question format.

STATE OF ORIGIN RECODE
(Q. 23, Deck 2, Col. 8)

Intent of Recode

Although the place of residence at age 16 was collected and coded for the state level, it was recoded for three reasons: (1) anonymity was seen as a potential problem in rural areas, where occupational and residential characteristics might make it possible to reconstruct the identity of a respondent; (2) comparability with the information on place of interview is made possible by the recode, since place of interview is coded by region only; and (3) recoding provides for the relative ease of handling one digit of information rather than two.

Method of Recode

Using the component parts drawn from the nine-part Bureau of the Census regional classification, states of origin were recoded into regions. The state components are listed at Q. 23. The only necessary modification was the addition of the number zero to represent the foreign born.

GEOGRAPHIC MOBILITY RECODE
(Q. 23-A, Deck 2, Col. 9)

Intent of Recode

This recode utilizes the information on state of residence at age 16, which was collected but not directly available for the reasons mentioned above. The recoded index provides a measure of geographic mobility which integrates the information on the city and state of interview with that of the city and state of residence at age 16.

Methods of Recode

If the state mentioned as residence at age 16 was the same as the state of interview, the interviewer was instructed to ask whether the city of early residence was also the same. If the respondent indicated that it was, these data were coded as 1. If the state of residence at age 16 was not the same as the state of interview, a code of 3 was used.

Original Question

IF STATE NAMED IS SAME STATE R. LIVES IN NOW, ASK A:

A. When you were 16 years old, were you living in this same (city/town/county)?

Yes....................1
No.....................2

ETHNICITY RECODE

(Qs. 30-33, Deck 2, Cols. 19-36)

Intent of Recode

The ethnicity data, as originally collected, represent responses to two separate questions. One set of columns was used if the respondent was able to name one country of ancestral origin, and a different set was used if the respondent named more than one and chose one of them. If the respondent named more than one but was unable to choose between them, no summary ancestral origin was assigned. The question was recoded for two reasons: the data format was potentially cumbersome, and it was anticipated that some users would be interested in summary ancestral identification regardless of the method used to obtain that information. Therefore, summary ancestry and method of response were recoded as two separate variables. The first two columns (cols. 19-20) contain country of ancestry if provided, the next six columns the first (cols. 21-22), second (cols. 23-24), and third (cols. 25-26) ethnicity mentioned (if any mention) and the ninth column (col. 27) describes the conditions under which ancestry was given; i.e., volunteered as a first choice, given in response to a forced choice question, or not provided at all. Spouse's ethnicity is coded in a similar fashion.

ETHNICITY RECODE (Continued)

Method of Recode

If only one country was provided as the country of ancestry, that country was listed as summary ethnicity in the first two columns, and the method of response, "names only one country," was coded as 1 in the third column. If the respondent named more than one country, he was asked to choose between them. The country chosen was considered the ethnicity, and the method of response, "names two or more countries and chooses one," was coded as 2. If more than one country was named and the respondent was unable to choose between them, no country was assigned as summary ethnicity, and "names two or more countries but can't choose" was coded as 3. If the respondent was unable to list any countries, no summary ethnicity was assigned and the method of response, "unable to name countries," was coded as 4.

Original Question

HOUSEHOLD COMPOSITION RECODE
(Qs. 32-34, Deck 2, Cols. 22-28)

1975

Intent of Recode

Half of the sample for the 1975 General Social Survey was a full probability sample, with predesignated respondents (See Appendix A: Sampling Design). For this portion of the sample, Household Enumeration Forms were completed for the chosen households prior to selection of the actual respondent. The questionnaires for the block quota half of the sample were therefore modified in order to obtain information comparable to that on the Household Enumeration Form. The data thus collected were recoded in order to conform in format to the household composition variables of previous General Social Surveys.

Method of Recode

The information collected about each household member was used to obtain the number of residents in each age group.

Original Question

A number of questions were asked about each household member. Those used in computing the variables on the General Social Survey are:

2) Please tell me the names of the people who usually live in this household?

3) Have we forgotten anyone: such as babies or small children; roomers; people who usually live here but are away temporarily--on business trips, vacations, temporarily in a hospital, and so on?

5) What is (PERSON)'s relationship to (HEAD OF HOUSEHOLD)?

7) How old was (HEAD/PERSON) on (his/her) last birthday?

9) Are any of the people we have listed staying somewhere else right now?

IF YES:

10) Who is staying somewhere else right now?

11) Where is (PERSON) living right now: is (PERSON) staying at another household; is (he/she) traveling; is (he/she) in some institution or dormitory--like at college, or in a hospital or somewhere; or what?

1977-1985

Household composition was determined as in 1975, but relationship to respondent was asked in questionnaire instead of being taken from Q. 5 in the Household Enumeration Form.

Original Question

Now I would like you to think about the people who live in this household. Please include any persons who usually live here but are away temporarily--on business, on vacation, or in a general hospital--and include all babies and small children. Do not include college students who are living away at college, persons stationed away from here in the Armed Forces, or persons away in institutions.

Is everyone in the household related to you in some way?

YES
NO (ASK A)

A. IF NO: How many persons in the household are not related to you in any way?

WORK SCHEDULE RECODE
(Qs. 46, 48; Deck 2, Cols. 60, 62)

Intent of Recode

This question was included in the questionnaire by the NORC Sampling Department as a check on sample representativeness. Although collected for this purpose, we thought the information might be of interest to some users. Since the original seven-column code was too cumbersome for analytic purposes, the information was recoded, concentrating on the distinction between those working a regular week and those working mainly weekends.

Method of Recode

The work pattern of each respondent who worked full-time (35 hours or more) was examined and the pattern was recoded according to the following categories: a regular Monday thru Friday week; a Monday thru Friday plus Saturday or Sunday week; mainly weekends; or a week without a set schedule. The punches and marginals for this recode are in Deck 2 Column 60 for the respondent and in Deck 2 Column 62 for the spouse.

Original Question

46 & 48. What days of the week do you normally work? CODE ALL THAT APPLY.

Monday	1
Tuesday	2
Wednesday	3
Thursday	4
Friday	5
Saturday	6
Sunday	7
No set schedule, varies	8

SRC NEW BELT CODE
(Q. 52; Deck 2, Col. 68)

Intent of Recode

The SRC belt code (a coding system originally devised to describe rings around a metropolitan area and to categorize places by size and type simultaneously) first appeared in an article written by Bernard Laserwitz (*American Sociological Review*, v. 25, no. 2, 1960), and has been used subsequently in several SRC surveys. Its use was discontinued in 1971 because of difficulties particularly evident in the operationalization of "adjacent and outlying areas." For this study, however, we have revised the SRC belt code for users who might find such a variable useful. The new SRC belt code utilizes "name of place" information contained in the sampling units of the NORC Field Department.

Method of Recode

This recode assigns codes to the place of interview. City characteristics were determined by reference to the rank ordering of SMSAs in the *Statistical Abstract of the United States*, 1972, Table 20. Suburb characteristics were determined by reference to the urbanized map in the U.S. Bureau of the Census, *1970 Census of Population, Number of Inhabitants*, Series PC (1) -A. The "other urban" codes were assigned on the basis of county characteristics found in Table 10 of the *1970 Census of Population, Number of Inhabitants*. For cases from the 1980 frame analagous tables from the 1980 Census were used.

PARTY AFFILIATION RECODE
(Q. 61, Deck 4, Col. 7)

Intent of Recode

The question was recoded so that it would match the Michigan Survey Research Center's presentation of the data.

Method of Recoding

The recode considers both the party affiliation and the subjective intensity of that party affiliation in the assignment of new codes.

Original Question

56. Generally speaking, do you usually think of yourself as a Republican, Democrat, Independent, or what?

Republican (ASK A)........1
Democrat . (ASK A)........2
Independent (ASK B).......3
Other (SPECIFY AND ASK B).4
No Preference (ASK B).....8

A. IF REPUBLICAN OR DEMOCRAT: Would you call yourself a strong (Republican/Democrat) or not a very strong (Republican/Democrat)?

Strong....................1
Not very strong...........2

B. IF INDEPENDENT NO PREFERENCE, OR OTHER: Do you think of yourself as closer to the Republican or Democratic Party?

Republican................3
Democratic................4
Neither...................8

QUALITIES FOR CHILDREN RECODE
(Q. 164A-M; Deck 8, Cols. 22-34)

Intent of Recode

The codes were assigned to the responses so that they formed an ordinal scale ranging from the "one most desirable" to the "one least desirable."

Method of Recode

Qualities not chosen as one of the three most desirable or the three least important were simply assigned the code (3).

Original Question

1. Which three qualities listed on this card would you say are the most desirable for a child to have? CIRCLE THREE CODES ONLY IN COLUMN A.
2. Which one of these three is the most desirable of all? READ THE THREE R. CHOSE. CODE ONE ONLY IN COLUMN B.
3. All of the qualities listed on this card may be desirable, but could you tell me which three you consider least important: CIRCLE THREE CODES ONLY COLUMN C.
4. And which one of these three is least important at all? READ THE THREE R. CHOSE. CODE ONE ONLY IN COLUMN D.

	Most Desirable		Least Important	
	A. Three Most	B. One Most	C. Three Least	D. One Least
A. that he has good manners	2	1	4	5
B. that he tries hard to succeed	2	1	4	5
C. that he is honest	2	1	4	5

(Same format through M.)

QUALITIES FOR CHILD RECODE
(Q. 165A-M; Deck 8, Cols. 35-47)

Recoded same as Q. 164 above.

ORGANIZATIONAL MEMBERSHIP RECODE

(Q. 172; Deck 8, Cols. 14-15)

Intent of Recode

For user convenience, the total number of organizations has been computed.

Method of Recode

If a respondent answered a "No" to all of the organizational items, Cols. 14-15 were code "00." If a respondent answered "Yes" to any organizations, the total number of "Yes" responses was counted and put in Cols. 14-15.

Original Question

Question presented in the codebook is as it appeared in the questionnaire.

TRAUMA RECODES
(Qs. 268-278; Deck 12, Cols. 32-53)

Intent of Recodes

For user convenience, the information on traumatic events has been presented in a condensed and abridged format. Users interested in the unabridged data should contact the GSS project staff at NORC 6030 So. Ellis Ave., Chicago, Ill. 60637.

Method of Recodes

In the following detailed description of the trauma recodes the user is directed to the full, original wording of the questions on pages 418-425.

A. DIVORCE5 (Deck 11, Col. 32)
If 21.B.1, 21.B.2, 21.C.1, and 21.C.2 equal "No" then DIVORCE5 equals punch "0."
If 21.B.1 or 21.C.1 equal "Yes" and 21.B.2 or 21.C.2 equal "Yes," then DIVORCE5 equals punch "3."
If 21.B.1 or 21.C.1 equal "Yes" and 21.B.2 and 21.C.1 equal "No," then DIVORCE5 equals punch "2."
If 21.B.1 and 21.C.1 equal "No" and 21.B.2 or 21.C.2 equal "Yes," then DIVORCE5 equals punch "1."
If 21.B.1, 21.B.2, 21.C.1, or 21.C.2 equal "9," then DIVORCE5 equals punch "9."

B. DIVREL1 (Deck 11, Col. 33)
Sum of relatives coded in 22.A.1.

C. DIVREL4 (Deck 11, Col. 34)
Sum of relatives coded in 22.B.1.

D. UNEMP5 (Deck 11, Col. 35)
If 28 equals "No" or 28.A and 28.B equal "No," then UNEMP5 equals punch "0."
If 28.A equals "No" and 28.B equals "Yes" and 28.B.1 equals "No," then UNEMP5 equals punch "1."
If 28.A equal "No" and 28.B equals "Yes" and 28.B.1 equals "Yes," then UNEMP5 equals punch "2."

O. SIBDEATH (Deck 11, Col. 46)
Coded in an analogous manner to CHLDDTH.

P. SPDEATH (Deck 11, Col. 47)
Coded in an analogous manner to CHLDDTH (e.g., if MARITAL equals "never married" then SPDEATH equals "Blank")..

Q. TRAUMA1 (Deck 11, Col. 48)
Number of traumas happening to respondent last year (count one if DIVORCE5 equals "2" or "3," HOSDIS5 equals "2" or "3," DEATH5 equals "3,4,5,6,7, or 8," and UNEMP5 equals "3,4,5,6,7, or 8."
If DIVORCE5, UNEMP5, HOSDIS5, or DEATH5 equals "9," then TRAUMA1 equals "9."

TRAUMA RECODES (Continued)

R. TRAUMA5 (Deck 11, Col. 49)
Number of traumas happening to respondent during last five years (count one each if DIVORCE5 or HOSDIS5 equals "1, 2, or 3" or DEATH5 or UNEMP5 equals "1, 2, 3, 4, 5, 6, 7, or 8").
If DIVORCE5, UNEMP5, HOSDIS5, or DEATH5 equals "9," then TRAUMA5 equals "9."

S. TRAREL1 (Deck 11, Col. 50)
Number of traumas happening to respondent's relatives during the last year (count one each if DIVREL1, UNREL1, or HOSREL1 greater than zero).
If DIVREL1, UNREL1, or HOSREL1 equals "9," then TRAREL1 equals "9."

T. TRAREL5 (Deck 11, Col. 51)
Number of traumas happening to respondent's relatives during the last five years.
If DIVREL1 or DIVREL4 greater than zero, then TRAREL5 counts 1.
If HOSREL1 or HOSREL4 greater than zero, then TRAREL5 counts 1.
If UNREL1 or UNREL4 greater than zero, then TRAREL5 counts 1.
If DIVREL1 and/or DIVREL4 equals "9" and the other equals "0," then TRAREL5 equals "9."
If HOSREL1 and/or HOSREL4 equals "9" and the other equals "0," then TRAREL5 equals "9."
If UNREL1 and/or UNREL4 equals "9" and the other equals "0," then TRAREL5 equals "9."

U. TRATOT1 (Deck 11, Col. 52)
Sum of TRAUMA1 and TRAREL1. If either TRAUMA1 or TRAREL1 equals "9," then TRATOT1 equals "9."

V. TRATOT5 (Deck 11, Col. 53)
Sum of TRAUMA5 and TRAREL5. If either TRAUMA5 or TRAREL5 equals "9," then TRATOT5 equals "9."

(Q.315; Deck 14, Cols. 24-33)

315. IF LESS THAN 5 NAMES MENTIONED CROSS OUT UNUSED BOXES.

Please think about the relations between the people you just mentioned. Some of them may be total strangers in the sense that they wouldn't recognize each other if they bumped into each other on the street. Others may be especially close, as close or closer to each other as they are to you.

First, think about NAME 1 and NAME 2. ASK Q.315 FOR FIRST PAIR.

A. Are ______________ and ___________ total strangers?

IF YES.....ASK Q.315A FOR NEXT PAIR DOWN
IF NO......ASK Q.315B

B. Are they especially close? PROBE: As close or closer to each other as they are to you.

Intent of Recode

To simplify analysis, mutually exclusive dichotomies were collapsed into a single three-point scale.

Method of Recode

A response of "yes" to part A became code 3, "total strangers." A response of "no" to part A and "no" to B became code 2, "neither close nor strangers." A response of "yes" to part B became code 1, "especially close."

WORD TEST RECODE

(Q. 326; Deck 15, Cols. 59-70)

Intent of Recode

A ten-item word test was administered to respondents; as indicated in the previous usage appendix, the ten items were selected from the twenty-item Gallup-Thorndike verbal intelligence Form A. This test, developed by R.L. Thorndike and Irving Lorge for use in survey research, appeared on Gallup surveys of the early 1940's. Reliability coefficients range from .80 to .85.

To minimize the admittedly small possibility that some form of publicity would affect the public's knowledge of the words included in the test, they are not reported here.

Method of Recode

For each of the ten words, there were five words (meanings) from which the respondent could choose. Each answer was scored as correct or incorrect, and the number of correct responses was summed. Respondents who did not attempt the test or who did not attempt a particular item are coded "9", No Answer.

Columns 69-70 provide the total number of words correct. Respondents who declined to guess on any of the words were given a score of "99".

Original Question

The original question had ten words appearing in a format identical to that of the example--Beast.

[a] Birth cohort can be computed from YEAR (Deck 1, Cols. 1-2) and AGE (Deck 1, Cols. 56-57). Marriage cohort can be computed from YEAR (Deck 1, Cols. 1-2), AGEWED (Deck 1, Cols. 24-25), and AGE (Deck 1, Cols. 56-57).

APPENDIX F:

OCCUPATIONAL CLASSIFICATION DISTRIBUTIONS
(Qs. 2, 5, 6; Deck 1, Cols. 13-15, 33-35, 43-45)

This appendix contains a five-digit occupational classification; the first three digits are the 1970 U.S. Census occupational codes, and the last two digits are the Hodge-Siegel-Rossi Prestige Scores (see Appendix G for discussion and distributions of the prestige scores).

The U.S. Census Bureau has assigned a three-digit number code to each occupational title. A listing of codes pertinent to this study was taken from an index of approximately 23,000 occupational titles. These codes appear under the column headed "Punch, Occupation." For further detail, see U.S. Bureau of the Census, _1970 Census of Population, Alphabetical Index of Industries and Occupations_, Washington, U.S. Government Printing Office, 1971; and U.S. Bureau of the Census, _1970 Census of Population, Classified Index of Industries and Occupations_, Washington, U.S. Government Printing Office, 1971.

The frequencies for each occupational classification are listed in this appendix for the respondent, the respondent's father, and the respondent's spouse.

APPENDIX G:

PRESTIGE SCORE DISTRIBUTIONS
(Qs. 2, 5, 6; Deck 1, Cols. 16-17, 36-37, 46-47)

The prestige scores assigned to occupations in this study were taken from a rating system developed at NORC in 1963-1965 in a project on occupation prestige directed by Robert W. Hodge, Paul S. Siegel, and Peter H. Rossi. This concept of prestige is defined as the respondents' estimation of the social standing of occupations. The prestige scores in the Hodge-Siegel-Rossi study were generated by asking respondents to estimate the social standing of occupations via a nine-step ladder, printed on cardboard and presented to the respondent.

> The boxes on the ladder were numbered 1-9 from bottom to top. In addition, the first, fifth, and ninth boxes were labeled "bottom," "middle," and "top," respectively. The occupational titles were printed on small cards and the occupational prestige ratings were collected by requesting respondents to sort the cards into boxes formed by the rungs of the ladder. [P. 35.][1]

Significance testing between two prestige scores, or among a group of scores, requires knowledge about the standard errors. Since there is a different standard error term for each pair of scores, Siegel has provided a few values which are likely to exceed most actual standard errors. For more detail on standard error, sources of the prestige scores, and the method of translating the respondents' rankings into a standardized metric system, see Siegel, Prestige in the American Occupational Structure.

[1] Paul S. Siegel, Prestige in the American Occupational Structure. Unpublished Ph.D. dissertation, Department of Sociology,

The prestige score was originally designed for use with the 1960 U.S. Census occupational codes and has been adapted to the 1970 listing as follows:

1) If the occupation was a new one assigned to a previously existing subdivision (e.g., Engineers within the major category "Professional, Technical, and Kindred Workers"), it received the prestige score for the general n.e.c.[1] category of that subdivision.

2) If the occupation was grouped with a like occupation in 1960 but divided from it in 1970, both occupations received the same 1960 prestige score.

3) If this occupation was completely new to the list and was not assigned to an existing subdivision, it received the prestige score of the n.e.c. category for the major occupational division.

   All adaptions are marked with a "*" next to the occupational classifications. (See Appendix F.)

4) The craft score was used for apprentices when the craft score was less than 41. If the craft score was greater than 41, the apprentice score of 41 was used.

For an alternative means of assigning prestige codes to 1970 Census categories see Robert M. Hauser and David L. Featherman, The Process of Stratification: Trends and Analysis. New York: Academic Press, 1977.

INDUSTRIAL CLASSIFICATIONS DISTRIBUTIONS
(Qs. 2, 5, 6; Deck 1, Cols. 20-22, 40-42, 50-52)

This appendix contains a three-digit industrial classification. The U.S. Bureau of the Census has assigned a three-digit number code to each occupation. The listing of codes pertinent to this study was taken from an index of approximately 19,000 industry titles. These codes appear under the column headed "Punch, Industry." For further detail, see U.S. Bureau of the Census, *1970 Census of Population, Classified Index of Industries and Occupations*, Washington, U.S. Government Printing Office, 1971.

APPENDIX I:

DOT VARIABLES
(Qs. 58A,B,C,D,E,F, 59A,B,C,D,E,F, 60A,B,C,D,E,F, DECK 3, Cols. 7-75)

The third edition of the Dictionary of Occupational Titles (1965) provides a six-digit (expanded to nine digits in 1967) occupational classification code which is more detailed and more clearly oriented to the task content of jobs than the Census occupational codes. The DOT (Dictionary of Occupational Titles) also includes six worker trait components, which are estimated abilities and individual characteristics required of workers for successful performance in general types of jobs.

The DOT variables for the General Social Survey were provided by Lloyd V. Temme. Using data from the April, 1971 Current Population Survey (CPS) which were coded with both the detailed Census and DOT occupation codes, Temme summed and averaged all respondents' DOT scores within each detailed Census category. By applying the CPS weights for each case, Temme was able to create weighted average DOT data scores for each Census occupation which are representative of the national population. Scores were created in this way for five DOT variables: Data, People, and Things (the fourth through the sixth digits of the detailed DOT occupation code), and the two parts of worker traits for training time (General Educational Development and Specific Vocational Preparation). These five variables are the only DOT variables available for the General Social Surveys.

Also provided is a prestige variable that Temme generated from Siegel gathered data (See Appendix G) using procedures developed by Otis D. Duncan for his Socioeconomic Index (SEI).

A detailed account of both the DOT variables and of the actual procedures followed in deriving the weighted average DOT scores is given in Lloyd Temme's Occupation: Meanings and Measures (Washington, D.C., Bureau of Social Science Research, 1975).

All of these variables are interval level. Qs. 58 A-E, and 60 A-E are four digits long. The first digit is a zero, and a decimal point should be read between the second and third digits. Qs. 58F, 59F, and 60F are three digits long and a decimal point belongs between the second and third digits. Since these variables are continuous, complete marginals are not given.

APPENDIX M:

CHANGES IN QUESTION WORDING, RESPONSE CATEGORIES, AND FORMAT

It is the general policy of the General Social Survey to exactly replicate questions over time. In certain instances, by design--and in other cases by accident--wordings, response categories, skip patterns, or formats have changed across surveys. This appendix documents the alterations that have occurred and, when applicable, the necessary reconciliations that were made.

Question Number	Changes
1,4	In the 1972 survey the first unread response was "Working full time (35 hours or more)" and the second response was "Working part time (1 to 34 hours)." Since 1972 the hour references were dropped.
2	In 1982 and 1983 it read "(do you/did you) normally do."
5	In the 1972, 1973, 1975, 1977, 1978, 1983 and 1984 surveys part A read "(does [spouse]) (did [spouse] normally)." In 1974, it was "(does [spouse] usually)." In 1976, 1980, 1982, and 1985 it was "(does/did) your [spouse] normally."
6	The wording for the first two surveys (1972-73) was "What kind of work did your father (FATHER SUBSTITUTE) normally do?" In the following surveys (1974-78, 1980, 1982-1985) it was "What kind of work did your father (FATHER SUBSTITUTE) normally do while you were growing up?"
7	In the 1976 survey the word "please" preceded "count" at the start of the second sentence. In the 1972, 1973, 1974, 1975, 1977, 1978, 1980, 1982, 1983, 1984, and 1985 surveys "please" was not used.
9	In the 1972-75 surveys age was recorded from the question "In what year were you born?" In 1976-78, 1980, 1982-1985 it was coded from "What is your date of birth?"
12-19	In the 1972-74 surveys those answering 11th or 12th grade to the introductory question were asked "Did you ever get a high school diploma?" In the 1975-78, 1980, 1982-1985 surveys those who finished at least the 9th grade were asked part A, "Did you get a high school diploma or a GED certificate?" In the 1972-74 surveys part B asked, "Did you complete one or more years of college for credit?"

Question Number	Changes
12-19 (Cont.)	In the 1975-84 the phrase "... not including schooling such as business college, technical or vocational school" was appended. In the 1972, 1975-78, 1980, 1982-1985 surveys part B1 inquired, "How many years did you complete?" In the 1973-74 surveys "--not including schooling such as business college, technical or vocational school" followed. In the 1972-73 surveys part B3 asked "What degree?" and the unread responses were Jr. College, Bachelor's, and Graduate. In the 1974 survey the first response was changed to "Junior College." In the 1975 survey the question became "What degree or degrees?" This wording was also used in the 1976-78, 1980, 1982-1985 surveys, but the first response was changed to "Associate/Junior College." In 1972 and 1973 high levels of No Answers occurred on Qs. 16-19. This was corrected in 1974 by a reformatting of the physical layout of the items.
21	The increased proportion other in 1984 and 1985 appears due to a tendency to classify Hispanics as a distinct race.
24	The unread response categories of the family situation question were changed between the 1972 and 1973-78, 80, 82-85 surveys as follows:

1972	
Both own mother and father	1
Father and stepmother	2
Mother and stepfather	3
Father only	4
Mother only	5
Some other male relative (SPECIFY)	6
Some other female relative (SPECIFY) ...	7

Question Number	Changes
26	Not Applicable (living in institution) not coded in 1974-1985.
30A	In the 1972-73 surveys American Indians were coded as "Other," punch "29." In the 1974-78, 1980, 1982-1985 surveys American Indians were a precoded ethnicity, punch "30." American Indians have been recoded to "30" for all surveys. After the 1977 survey a general review of the ethnicity coding was made and all "Other" lists for 1972-77 were examined. Based on this review the pre-listed "National Codes" were revised. Nations that were not on the list but which accounted for .1 percent of the cases from 1972 to 1977 (an arbitrary minimum percentage) were prelisted in the "National Codes" in 1978, 1980, 1982-1985. This added Belgium, India, Lithuania, Portugal, Rumania, and Yugoslavia. One code, "West Indies," was deleted from the "National Codes" since it referred neither to a country nor a distinct ethnic group. At the same time several changes were made in the general coding of the ethnicity question. First, the review revealed that a few cases coded "Other" actually represented countries already precoded (e.g., Bohemia to Czechoslovakia, Togo to Africa, and Dutch to The Netherlands). These were recoded to their proper nationality. Second, the cases in 1972-1977 matching the six new nationalities added in 1978 were recoded into their proper nationality. Third, codes of "West Indies" were examined and recoded into Non-Spanish West Indies (e.g., Jamaica), not specified West Indies, or into a new grouped category, Other Spanish. Fourth, two new grouped categories, Other Spanish (Spanish West Indies, Central America, and South America) and Arabic (Arabic countries of the Middle East and North Africa) were added. Finally, a large group of "Other" cases giving their origin as "United States," or "American," some particular region or state of the United States, or the like were recoded as "America." (While these responses were frequent enough to justify the creation of a precoded "America" category, this was not done in order not to encourage this response.) This minimized the number of cases remaining in the "Other" category to about eight cases per survey. In 1984 and 1985 the ethnicity question was adapted to recode up to three ethnicities mentioned

Question Number

33,34

In the 1972-74 and 1976 surveys, the following question was used to determine household composition:

A. How many persons altogether live here, related to you or not? Please include any persons who usually live here but are away temporarily--on business, on vacation, or in a general hospital--and all babies and small children. Do not include--college students who are living away at college, persons stationed away from here in the Armed Forces, or persons away in institutions. (Don't forget to include yourself in the total.)

IF TOTAL IS ONE PERSON, ENTER 01 AND SKIP TO NEXT QUESTION

. . TOTAL PERSONS: ☐☐

B. How many of these persons are babies or children under 6 years old? UNDER 6 YEARS: ☐

C. How many are children age 6 thru 12? 6-12 YEARS: ☐

D. How many are teenagers 13 thru 17? 13-17 YEARS: ☐☐

E. And how many are persons 18 and over? 18+ YEARS: ☐☐

B-E SHOULD TOTAL TO A; IF NOT, CHECK ANSWERS WITH RESPONDENT.

In the 1975, 1977, 1978, 1980, 1982-1985 surveys, household composition was determined from household enumeration questions used in full probability samples. They were:

2) Please tell me the names of the people who usually live in this household?

3) Have we forgotten anyone--such as babies or small children; roomers; people who usually live here but are away temporarily, on business trips, vacations, [82: at school,] temporarily in the hospital, and so on?

7) How old was (HEAD/PERSON) on (his/her) last birthday?

9) Are any of the people we have listed staying somewhere else right now?

IF YES:

10) Who is staying somewhere else right now?

11) Where is (PERSON) living right now: is (PERSON) staying at another household; is (he/she) traveling; is (he/she) in some institution or dormitory--like at college, or in a hospital or somewhere; or what?

Changes

Question Number

35 In the 1972-74 and 1976 surveys relation of household members to respondent was asked as follows:

Is everyone in the household related to you in some way?

Yes 1
No ... (ASK A) 2

A. IF NO: How many persons in the household are not related to you in any way

☐☐

In the 1975 survey relationship was determined from the following question from the household enumeration questions:

5) What is (PERSON'S) relationship to (HEAD OF HOUSEHOLD)?

In the 1977-78, 1980, 1982-1985 surveys, relationship was asked as follows:

Now I would like you to think about the people who live in this household. Please include any persons who usually live here but are away temporarily--on business, on vacation, or in a general hospital--and include all babies and small children. Do not include college students who are living away at college, persons stationed away from here in the Armed Forces, or persons away in institutions.

Is everyone in this household related to you in some way?

Yes 1
No ... (ASK A) 2

A. IF NO: How many persons in the household are not related to you in any way

# PERSONS: ☐☐

37-39 In order to avoid bunching in a few income groups the response categories were revised between 1972 and 1973, 1976 and 1977, and 1980 and 1982. Each of these three groupings are treated as a separate question and variable.

38,39,43 In 1975, 1976, 1980, 1982-1985 "occupation" appeared in the parentheses. In 1974 and 1977 "job" was used. In 1978 "occupation" was used first and "job" second.

51-53 The size of place variables were re-evaluated in 1978 and standard conventions were used to code all years. Cases from the 1980 frame used 1980 Census figures.

Question Number	Changes
61	The skip pattern within Q. 61 varied over the years. In the 1972-74 surveys those responding Republicans or Democrats were asked Part A, those answering Independent were asked part B, and those giving Other were asked the next question. In 1975, 1977-78, 1980, 1982-1985 those answering Other and the new response, No preference, were asked part B. In the 1976 survey those answering Other and No preference were asked the next question. In the 1975 survey the following underlined articles were used: "a Republican, a Democrat, an Independent." In the 1972, 1973, 1974, 1976, 1977, 1978, 1980, 1982-1985 surveys no articles were used. The appearance of 10 DK cases in 1975 suggests that a different coding and recording scheme was used in 1975 than in other years.
62, 63, 64	On Q. 62 in 1972 and 1973 and on Q. 63 on 1973, 1974, and 1975 "ineligible" (Punch 3) was a precoded category that included volunteered responses only. On Q. 63 in 1976 and 1977 and on Q. 64 in 1977, 1978, 1980, and 1982 "ineligible" (Punch 3) included volunteered responses plus respondents who had not turned 18 by election day in 1972 (for Q. 63) or in 1976 (for Q. 64). Note that in initial versions of the 1977 and 1978 surveys that Q. 63 in 1977 and Q. 64 in 1977 and 1978 "ineligible" (Punch 3) included volunteered responses plus respondents who had not turned 17 by the appropriate election day. Responses to parts A and B of Qs. 63-64 were adjusted accordingly.
63A	In the 1973-74 surveys "Refused," punch "4," was not precoded, but was coded from verbatim responses. In the 1975 survey, "Did not vote for President," punch "5," was a precoded response. In the 1976-77 surveys coding specifications called for coding verbatim responses as "wouldn't vote," punch "5." In general, codes "4" and "5" can be considered as equivalent codes across surveys. In 1978 response "8" was "Don't know/Can't remember."
69	The first spending area was "Space Exploration Program" in 1973-76 and "The Space Exploration Program" in 1977-1985.
78	Response "R pays no income tax" (Punch 4) was not employed on the 1980 survey.
79	The 1976 survey used "community" alone.
71	In 1977 the phrase "(Negroes/Blacks)" was used.
82C	In 1980 "was" used instead of "is". In 1982 and 1983 "would" was used instead of "should."

Changes

Question Number

85, 86 — The capital punishment question was reworded between the 1973 and 1974 surveys. The original wording appears in Q. 85 and the new wording in Q. 86.

88 — In the 1974, 1975, and 1977 surveys "get" was used instead of "obtain."

104 — In the 1972 survey codes for Other Protestant denominations were slightly different than the 1973-78, 1980, 1982, 1983 and 1984 codes. To reconcile these differences the following recodes were made:

1972 Code	1973-84 Codes	1972 Code	1972-84 Codes
11 =	77	55 =	20
21 =	20	57 =	97
32 =	9	62 =	63
34 =	20	63 =	75
38 =	63	66 =	19
39 =	36	67 =	43
50 =	12	73 =	74
52 =	68	75 =	71

Since 1984 a more refined list of Protestant denominations has been employed. Items coded simply as Baptist, Lutheran, Methodits, or Presbyterian in 1972-1983 were coded into the "Don't know which" categories, respectively 18, 38, 28, and 48.

113 — In the 1985 survey codes of "Don't know" were systematically distinguished from "No answer" codes.

121, 123, 124, 125, 126, 128, 129, 130, 133 — Until 1978 Qs. 121, 123, 124, 125, 126, 128, 130, and 133 were asked of non-blacks only. Since 1978 they have been asked of all respondents. Qs. 123, 126, 126A, 126B, 128 and 130 were asked in terms of opposite race. Qs. 121 and 124B and Qs. 124, 125, and 126C were asked in reference to blacks as given.

124 — In the 1972-73 surveys "Negro" was used instead of "(Negro/Black)." In the 1973 survey the lead was "I'm going to read some opinions other people have expressed in connection with Negro-White relations. Please tell me which statement on this card comes closest to how you yourself feel about each one of these opinions." In the 1975 survey the lead was "Here is an opinion other people have expressed in connection with (Negro/Black)-White relations. Please tell me which statement on this card comes closest to how you, yourself feel about it." The phrase "The first one is ..." is used in years that both parts are asked (1972, 1976, 1977, 1978, 1980, 1982-1985).

Question Number	Changes
125	In the 1976 survey the B option was refusing "to sell to someone because of his race or color." In the 1973, 1975, 1978, 1980, 1983, 1984 surveys the word "their" was used instead of "his." In the 1973, 1975, and 1976 surveys this question was asked of whites only. In the 1978, 1980, and 1983 surveys this was asked of both races. In 1973 and 1975 "who" was used. In 1976, 1978, 1980, 1983, 1984 "whom" was used.
125, 126, 130, 131, 133, 135	Since 1983 the choice of racial terms was listed "Black/Negro." In earlier years it was "Negro/Black."
126	In the 1972, 1973, 1975, 1976, 1978, 1980, 1982-1985 surveys the question read, "Are there any (Negroes/blacks) living in this neighborhood now?" In the 1974 and 1977 surveys the "now" was omitted. In the 1972-77 surveys this was asked of whites only. In the 1978, 1980, 1982-1985 surveys this was asked of both races. In 126, 126A, 126B, and 126C whites were asked about "Negro[es]/black(s)." In 126, 126A, and 126B blacks were asked about "whites." In 126C blacks were asked about "Negro/black." In 1972-75, 77, 78, 82-85, 126B asked "blocks (or miles)." In 1976 and 1980 it read "(blocks/miles)." In 1983 and 1984 126C used "Black" instead of "Negro/Black."
129	In the 1977 survey "same school" (singular) was used. In 1972 "Negro" was used. Since then "Negro/Black" was used.
130	In the 1972, 1974, 1975, and 1977 surveys this was asked of whites only. Since the 1977 survey this was asked of both races. Whites were asked about "Negroes/Blacks" and blacks were asked about "Whites."
133	In the 1972, 1975, and 1977 surveys this was asked of whites only. Since the 1977 survey this was asked of all respondents.

Changes

Question Number

162 The question was asked as indicated in the 1973, 1974, 1977, 1978, 1980, 1982, 1983, 1984 surveys (except that the banking institution appeared only since 1977). In the 1975-76 surveys the institutions were asked in the following order with the indicated phrases inserted:

A. First, how much confidence do you have in the people running the Executive branch of the federal government?

B. How about people running organized labor?

C. Press?

D. Military?

E. Major companies?

F. How about the people running organized religion?

G. Education?

H. Medicine?

I. TV?

J. U.S. Supreme Court?

K. How about the people running the scientific community?

L. Congress?

M. Banks and financial institutions?

164 In the 1975 survey part A reads, "The qualities on this card may all be important, but which three would you say are the most desirable for a child to have?" In the 1973, 1976, 1978, 1980, 1983, 1984 surveys it reads, "Which three qualities listed on this card would you say are the most desirable for a child to have?"

172 Originally in the 1974 data this was precoded as a dichotomy (belongs to no organizations/belongs to one or more). The 1974 data were revised to conform to the latter practice of coding the total number of organizations that respondent belonged to.

Question Number	Changes
175, 176, 177	There have been variations in which words in the introduction were underlined. In the 1977, 1978, 1980, and 1983 more or less/more or less was underlined. In the 1976 agree/disagree was underlined. In the 1974 more or less agree/more or less disagree was underlined. In 1973 both the 1977-78 and 1974 variations were used on parts of this question.
180	In the 1972 survey those keeping house were not asked this question. In all later surveys they were. In the 1972-74, 1977-78, 1980, 1982-1985 surveys those "unemployed, laid off, looking for work" were asked this question, but in the 1975-76 surveys they were not.
181	In the 1973-74, 1977, 1980, 1982, 1984 and 1985 surveys respondents "unemployed, laid off, looking for work" were asked this question. In the 1976 survey they were not.
190A	In the 1976, 1982 and 1985 surveys the question read "he or she."
195	In the 1973-74 surveys there was an unread response on "other [Specify]" which was eliminated from the later surveys. The precoded unread response was "Luck most important or help from other people" in the 1976 survey.
213	Code "4," "Not asked, inappropriate," was not precoded in surveys after 1977 as it had been in the 1972 and 1974-77 surveys. Because of this and changes in interviewer specifications (see Appendix B), marginals are not comparable across surveys.
213A	One response of "12" in the 1972 survey and one response of "10" in the 1974 survey were recoded to "8 or more." Code "9" includes "don't know" and "no answer" responses.
218	This lead was used for Q. 207 and Q. 208 in 1974, 1975, 1977, 1978, 1980, 1983, 1984 and 1985. In the 1973 and 1976 the lead was "There has been a lot of discussion about the way morals and attitudes about sex are changing in this country."
220	In the 1973-74 surveys there was an unread response of "Other [Specify]" which was dropped in later surveys.

Question Number	Changes
221	In the 1973 survey the question used a card listing items A-D and used the following opening, "On this card are some opinions about the effects of looking at or reading such sexual materials." In the 1976 survey no card was used, but the same opening sentence was used. In the 1975, 1978, 1983 and 1984 surveys "do" and "do not" were underlined.
221B	In the 1976 survey the article "a" was inserted as follows: "Sexual materials lead to a breakdown of morals. Emphasis added.
222	In the 1973 and 1975 surveys no card was used.
232	In the 1975 survey the list of situations was introduced with the lead, "Would you approve of a policeman striking a citizen who . . . ." In the 1973, 1976, 1978, 1980, 1982, 1984 and 1985 surveys that lead was "Would you approve if the citizen . . . ." Also in the 1975 survey part C was introduced "Would you approve of a policeman striking a citizen who . . . ."
233	In the 1975 survey the list of situations was introduced with the lead, "Would you approve of a policeman striking a citizen who . . . ." In the 1973, 1976, 1978, 1980, and 1983 and 1984 surveys the lead was "Would you approve if the citizen . . . ." Also in the 1975 survey part C was introduced "Would you approve of a policeman striking a citizen who . . . ."
232, 233	In the 1973 and 1975 surveys those replying "no" to the introductory questions skipped on to the next question. In the 1976, 1978, 1980, 1983 and 1984 surveys the situational subparts were asked of all respondents regardless of their answer to the introductory question.
234	In the 1977 survey the word "right" was omitted.
244	In the 1972-75, 1977, 1980, 1982, 1983 and 1984 surveys the question asked, "May I have your name and telephone number just in case my office wants to verify this interview? A. Is this phone located in your own home?" In 1978 "just" was omitted. In the 1976 survey it was, "Do you have a telephone? A. How many phone numbers altogether do you have? May I please have your name and (one of) your telephone number(s) just in case I have left something out in this interview? B. Is this phone located in your own home?" In the 1985 survey the question asked "to make sure I conducted" instead of "to verify".

In the 1973 and 1974 surveys the information used came directly from Q. 244. In the full probability halves of the 1975 and 1976 surveys and in the 1977, 1978, 1980, 1982-1985 full probability surveys, information from Q. 13 on the screener was also used to obtain the maximum amount of usable information (see Below).

Between the 1972 and 1973 surveys the response categories for respondent cooperation were altered. The original usage appears as Q. 245 and the revised usage as Q. 246.

APPENDIX N

PREVIOUS USAGE

Many of the questions in this study are replications of items previously occurring in national studies; many of these have also occurred in variant wordings in past studies. This appendix lists previous instances of question use. The majority of the previous studies were conducted by the American Institute of Public Opinion--The Gallup Poll (AIPO); the Survey Research Center, University of Michigan (SRC); and by NORC. All studies cited are national samples of the adult population, except where noted.

Substantive questions are included in the listing, but background questions are not. Although the wording of background questions is of interest to anyone considering trend analysis, the vastly different forms of these questions make a summarization impractical. Users interested in previous usage of background items in a particular study should contact the appropriate data archive for background questions available in that study and for other information about the study, including procedures for data acquisition.

The appendix is arranged by question order; the question number is given in a column to the left of the page and the variable name to the right under the heading "Previous Usage." In most cases, two sections titled "Exact Wording" and "Variant Wording" are included for each variable. The study citations within these sections include the agency which conducted the study, the study number, the date, and the question number. For example, the citation:

AIPO 150 (3/39), Q. 2.

refers to a study of the American Institute of Public Opinion (Gallup Poll), numbered 150, conducted in March, 1939, and containing this variable in Question 2. In the case of Survey Research Center Michigan (SRC) studies, the year is given only. The studies are grouped chronologically by agency; the archive which holds the data is given after each grouping.

Users interested in more information about these studies should either contact the archive specifically indicated in the study citations or the archives listed below, which hold the data from certain agencies:

[NOTE: Many NORC studies are serviced by Roper Public Opinion Research Center as indicated; please send inquiries to Roper.]

The term "Exact Wording" means that the wording used here is precisely the same as that of the studies cited. In a few cases, studies are also cited under this heading where the wording was not precisely the same but was very similar; differences in the wording are given in the entry.

Under the heading "Variant Wording," specific variations of question wording are not generally given. If a fair number of studies used the same variation of the question, however, some explanation of the question content is given which should be of some use to users who are interested in trend or time series analysis. In any event, users will have to contact the holding archive for additional information about the studies, and may obtain the actual question wording at that time.

The results of most of the questions are available from the archive either in published form or by specific data runs. In some cases, however, published sources for many of the questions are relatively easily available. The following list may be helpful in this regard.

101 COMMUNISM (New in 1973).

102 COMMUNISM (Variant of Q. 101).

103 IMAGES OF NATIONS

The scaling device used in this question is called the Stapel Scalometer which was developed by Jan Stapel of the Netherlands Gallup Poll (Gallup Opinion Index, Report no. 32, February, 1968, p. 20). AIPO has administered the scale in this country to rate other nations and personalities about 10 times from 1951 to 1973.

Question Number	Previous Usage
103 (Cont.)	The version of the scale used in this year's General Social Survey is close to, but not exactly the same form as the AIPO questions, which vary among themselves, also. For example, all AIPO questions begin with the statement "Here is an interesting experiment." In some cases the AIPO question includes "following countries," in others, "following organizations," and so on. Given these slight variations and the relative ease users will have in retrieving these questions from the Roper Center by use of the question inventory discussed in the Introduction to this appendix, we here simply list those AIPO studies which contain the Scalometer with some indication of content. AIPO 483 (12/51), Q.7 (England); 521 (10/53), Q.16 (Russia, England); 535 (8/54), Q.21 (Russia, England); 537 (9/54), Q.8 (Russia, China); 538 (10/54), Q.15 (England); 576 (12/56), Q.50 (Russia, England, Israel); 738 (12/66), Q.50 (Russia, Japan, England, Canada, Israel, Egypt); 852 (5/72), Q.5 (Russia, Japan, England, Canada, China); 868 (4/73), Q.4 (Soviet Union, Japan, Great Britain, Canada, Egypt); 874 (7/73), Q.18 (Russia). Data from Roper.

132 RACE RELATIONS-BUSING (Variant of Q.131)

133 RACE RELATIONS-BLACK PRESIDENT

This question was rephrased to parallel the question on a woman for President; see Q.198. Previous examples used the following wording: "There will be (there is always) much discussion about the qualifications of presidential candidates; their education, age, religion, race and the like. If your party nominated a generally well-qualified man for president and he happened to be a Negro, would you vote for him?"

The above version appears in the following surveys: AIPO 604 (9/58), Q.54; 649 (8/61), Q.31; 676 (8/63), Q.31; 714 (7/65), Q.15; 744 (4/67), Q.15; 776 (3/69), Q.3; 838 (10/71), Q.10. Data from Roper.

175-177 ANOMIA

The questions were first asked in a survey conducted in Springfield, Mass., in 1950, and reported in Leo Srole: "Social integration and certain corollaries: An exploratory study," *American Sociological Review*, v. 21, no. 6, December, 1956, pp. 709-716.

They were also included in the Mid-Town Manhattan study reported in Leo Srole and others: *Mental Health in the Metropolis: The Mid-town Manhattan Study*. New York: McGraw-Hill, 1962, and in the Detroit Area Study, in 1956, 1958, and 1961 (selected items); See Otis D. Duncan, Howard Schuman and Beverly Duncan, *Social Change in a Metropolitan Community*. New York: Russell Sage Foundation, 1973. Data for the Detroit Area Study are available from ICPSR.

326 VOCABULARY TEST

This vocabulary test is a version of the test used by Gallup and Thorndike in the early 1940's (see R.L. Thorndike and G.H. Gallup: "Verbal intelligence of the American Adult" *Journal of General Psychology*, v. 30, 1944, pp. 75-85). Further uses are cited and a specific application reported in John B. Miner, *Intelligence in the United States*. New York: Springer, 1957.

The version used in the present study is similar in word content to a 1966 NORC/SRS study. NORC/SRS 889-A (June, 1966), Q. 31. Data from Roper Center.

The earlier Gallup-Thorndike data are available from Roper as follows:

AIPO 244 (8/41), Q. 10B (K and T forms). Another word test is contained in POS A-959 (7/57), Q. 76, also available from Roper Center.

APPENDIX: P

OUTLINE OF VARIABLES IN THE GENERAL SOCIAL SURVEY

In the pages that follow, we present the various items cross-classified by content group and causal sequence. The number of items listed here does not correspond to the total number of "columns" of information or total "questions," since many items have a number of subquestions not classified separately (e.g., the abortion item has seven distinct situations presented for reactions) and for a small number of questions, subitems appear in different parts of the outline (see questions on spending, for example).

For brevity, item wordings are not presented, but the brief title should convey the gist of the topic. For details on question wording and previous usage, see the appropriate sections of this codebook.

The following codes are employed in the outline:

"P" means a permanent item to appear each survey. Some of the permanent items appeared in 1972 and will appear every year. This is represented by the last two digits of the years 1972-1984 (P: 72-84). Other permanent items made their first appearance in 1973 and run through 1984. This is indicated by P: 73-84.

"R" means a rotating item. About one-third of the items appear according to a rotation scheme. Most are included in two out of every three years. The last two digits of those years are listed after "R". R: 72, 74, 76, 77 means a rotating item which appeared in 1972, 1974, 1976, and 1977. Some items which were originally permanent items have been switched to rotating items.

"D" means an item which appeared once and then was dropped usually because of insufficient variation in response or a series was discontinued.

"O" means an item that appeared in a single survey and is not repeated. Most are split ballot or other methodological experiments.
